Chronicling her quest for wildness and home in Alaska, naturalist Marilyn Sigman writes lyrically about the history of natural abundance and human notions of wealth—from seals to shellfish to sea otters to herring, halibut, and salmon—in Alaska’s iconic Kachemak Bay. Kachemak Bay is a place where people and the living resources they depend on have ebbed and flowed for thousands of years. The forces of the earth are dynamic here: they can change in an instant, shaking the ground beneath your feet or overturning kayaks in a rushing wave. Glaciers have advanced and receded over centuries. The climate, like the ocean, has shifted from warmer to colder and back again in a matter of decades. The ocean food web has been shuffled from bottom to top again and again. In *Entangled*, Sigman contemplates the patterns of people staying and leaving, of settlement and displacement, nesting her own journey to Kachemak Bay within diasporas of her Jewish ancestors and of ancient peoples from Asia to the southern coast of Alaska. Along the way she weaves in scientific facts about the region as well as the stories told by Alaska’s indigenous peoples. It is a rhapsodic introduction to this stunning region and a siren call to protect the land’s natural resources in the face of a warming, changing world. When secrets threaten everything... “The suspense that’s woven into this book has you hanging on for the next chapter and I think that it really kept the story going.” [Review](#) Cartoonist Emmy Rivera loves everything about the quirky town of Bloo Moose, but that doesn’t mean she’s ready to put down roots. That’s never worked out for her in the past. Undercover agent Ryan Ward is always on the move, taking down criminal masterminds like the one who caused his dad’s death. Ryan doesn’t expect the only connection to his latest target to be a sweet and sexy cartoonist who makes him want to rethink everything. Putting down roots might not be so bad. If the lies don’t destroy them first. \*\*\* *Reaching For Roots* is the seventh book in the Bloo Moose Romance series. Each book can be read as a standalone. Natalie Monroe is looking for a second chance at love. Just as she's about to give up on romance, Daniel Weaver contacts her through their class website. Handsome and charming, he says all the right things to make her fall in love with him, and within a few months, moves into her apartment. Coming up with one scheme after another, he convinces her to finance his sketchy endeavors to earn money. As he slowly takes control of her life, Natalie finds herself on an emotional roller coaster, desperately trying to regain her independence. Entangled in love, money, and the dream, she's reluctant to leave Daniel, but faces financial ruin if she stays. This book constitutes the refereed proceedings of the 14th International Symposium on Algorithms and Computation, ISAAC 2003, held in Kyoto, Japan, in December 2003. The 73 revised full papers presented were carefully reviewed and selected from 207 submissions. The papers are organized in topical sections on computational geometry, graph and combinatorial algorithms, computational complexity, quantum computing, combinatorial optimization, scheduling, computational biology, distributed and parallel algorithms, data structures, combinatorial and network optimization, computational complexity and cryptography, game theory and randomized algorithms, and algebraic and arithmetic computation. The naval aviation safety review. 'A must read ... a new analytical agenda for the Anthropocene, coherently drawing out the power of thinking with islands.' - Elena Burgos Martinez, Leiden University 'This is an essential book. [The] analytics they propose ... offer both a critical agenda for island studies and compass points through which to navigate the haunting past, troubling present, and precarious future.' - Craig Santos Perez, University of Hawai'i, Manoa 'All academic books should be like this: hard to put down. Informative, careful, sometimes devastating, yet absolutely necessary - if you read one book about the Anthropocene let it be this. You will never think of islands in the same way again.' - Kimberley Peters, University of Oldenburg '... a unique journey into the Anthropocene. Critical, generous and compelling'. — Nigel Clark, Lancaster University The island has become a key figure of the Anthropocene - an epoch in which human entanglements with nature come increasingly to the fore. For a long time, islands were romanticised or marginalised, seen as lacking modernity’s capacities for progress, vulnerable to the effects of catastrophic climate change and the afterlives of empire and coloniality. Today, however, the island is increasingly important for both policy-oriented and critical imaginaries that seek, more positively, to draw upon the island’s liminal and disruptive capacities, especially the relational entanglements and sensitivities its peoples and modes of life are said to exhibit. *Anthropocene Islands: Entangled Worlds* explores the significant and widespread shift to working with islands for the generation of new or alternative approaches to knowledge, critique and policy practices. It explains how contemporary Anthropocene thinking takes a particular interest in islands as ‘entangled worlds’, which break down the human/nature divide of modernity and enable the generation of new or alternative approaches to ways of being (ontology) and knowing (epistemology). The book draws out core analytics which have risen to prominence (Resilience, Patchworks, Correlation and Storiatio) as contemporary policy makers, scholars, critical theorists, artists, poets and activists work with islands to move beyond the constraints of modern approaches. In doing so, it argues that engaging with islands has become increasingly important for the generation of some of the core frameworks of contemporary thinking and concludes with a new critical agenda for the Anthropocene. Graham Hancock has spent decades researching and writing some of the most ambitious and successful nonfiction investigations into ancient civilizations and wisdom. Entangled uses all of Hancock's skills and knowledge to propel a fantasy adventure like nothing else preceding it. Entangled is a timeslip novel alternating between present day California, Brazil, and prehistoric Spain, with two teenage female protagonists who must come together to avert an incredibly bloodthirsty takeover of the human race. Entangled is the first book in a trilogy relating the story of an unrelentingly evil master magician named Sulpa who is on the loose and determined to destroy humanity. Leoni, a troubled teen from modern day Los Angeles, and Ria, a young woman who lives in Stone Age Spain, meet in a parallel dimension outside the flow of time to stop Sulpa's spectacular, deadly materialization of the modern world. Entangled rides a growing wave of interest in parallel dimensions and imaginary worlds and will have immediate appeal to readers of Philip Pullman, Stephen King, Neil Gaiman, and Kate Mosse, among others. But Entangled has the added merit of being grounded in solid anthropological and scientific research. Hancock calls on his years of research into cutting edge issues, including the "Neanderthal Enigma," the nature of consciousness, the many worlds interpretation of quantum physics, parallel realms, time travel, and near death and out-of-body experiences. To Love and Serve (The Vampire Reborn Series) by Caridad Piñeiro

Born to Love... Five years ago, vampire Ryder Latimer stepped into the path of a bullet meant for FBI Agent Diana Reyes, at once saving her life and condemning her to death when his blood contaminates her open wounds. Now only an experimental treatment, transfusions, and allowing Ryder to sink his teeth into her when they make love keep her alive. Born to Survive... Ryder has always known that no matter what they try, Diana can't possibly survive what contact with his blood did to her. The reality for him is that no matter how much he loves her, he will lose her if he doesn't turn her—a choice Diana may have put off for too long. Born to Serve... Even as her health continues to deteriorate and they battle with that difficult decision, Diana tracks a serial killer targeting their vampire friends. It's a dangerous job, but she was born to it and, with Ryder's help, she'll serve and protect until the day she dies—or until a miracle turns their world upside down. For Love or Vengeance (The Vampire Reborn Series) by Caridad Piñeiro

FBI Special Agent Helene Alexander is a goddess. An actual frickin' goddess. And her mission is clear, see that justice is served at all times or her days as a goddess are numbered. Helene's new FBI partner defines good-looking, but Miguel Sanchez, wants nothing to do with her ends-justify-the-means attitude. He knows through experience the type of guilt her actions can bring and Miguel wants nothing to do with Helene's careless ways. Even if she's so damned hot she makes him burn with the need. When the serial killer they're tracking strikes again, Helene and Miguel are drawn into a case that will challenge their most fundamental beliefs about justice and vengeance. But it's the passion between them that forces a goddess to choose: eternal life with all her powers...or death—to save the man she loves. Patrick Williams and Chad Grant have known each other since preschool and have been bitter rivals for almost as long. Now adults, they both have families and careers, although they operate on very different sides of the law. Chad is one of the good guys, while everything Patrick does is corrupt, evil, and illegal. Matters grow complicated when Patrick's son, Michael, meets and falls deeply in love with Jade, Chad's daughter. Their relationship is tumultuous, however; after one too many screw-ups, Jade leaves Michael although he still believes they are soul mates. Chad is desperate to keep his family away from Patrick's, but Michael makes this difficult. Meanwhile, Patrick knows their families are connected in more ways than one and if he goes down, he plans to take Chad's family with him. Entangled in a web of scandal and deceit, Chad must fight to keep his family afloat or fall victim to the wicked plan of his lifelong nemesis. "MAY ALL THAT YOU WISH TO PROTECT BURN TO ASHES..." Having witnessed the staggering power of the Shadow Monarch, Jinwoo can't wait to level up and reach those heights, and what better way to do so than to mobilize his army of soldiers against an S-rank dungeon's worth of giants? Saving a country abandoned by the rest of the world has its benefits—international renown, the expansion of his guild, an invitation to the most prestigious hunter conference in the world—but perhaps the most unexpected bonus is a run-in with another Monarch who brings not-so-welcome tidings. If he's to be believed, a war is coming that not even Jinwoo is strong enough to stop... Seventeen-year-old Cade, a fierce survivor, feels alone in the universe until she learns that she was created in a lab in 3112 and entangled at a quantum level with a boy named Xan, sending her on a galaxy-spanning journey toward a real connection. 20,000 first printing. NEW YORK TIMES BESTSELLER • A “brilliant [and] entrancing” (The Guardian) journey into the hidden lives of fungi—the great connectors of the living world—and their astonishing and intimate roles in human life, with the power to heal our bodies, expand our minds, and help us address our most urgent environmental problems. “Grand and dizzying in how thoroughly it recalibrates our understanding of the natural world.”—Ed Yong, author of *I Contain Multitudes* ONE OF THE BEST BOOKS OF THE YEAR—Time, BBC Science Focus, The Daily Mail, Geographical, The Times, The Telegraph, New Statesman, London Evening Standard, Science Friday When we think of fungi, we likely think of mushrooms. But mushrooms are only fruiting bodies, analogous to apples on a tree. Most fungi live out of sight, yet make up a massively diverse kingdom of organisms that supports and sustains nearly all living systems. Fungi provide a key to understanding the planet on which we live, and the ways we think, feel, and behave. In *Entangled Life*, the brilliant young biologist Merlin Sheldrake shows us the world from a fungal point of view, providing an exhilarating change of perspective. Sheldrake's vivid exploration takes us from yeast to psychedelics, to the fungi that range for miles underground and are the largest organisms on the planet, to those that link plants together in complex networks known as the “Wood Wide Web,” to those that infiltrate and manipulate insect bodies with devastating precision. Fungi throw our concepts of individuality and even intelligence into question. They are metabolic masters, earth makers, and key players in most of life's processes. They can change our minds, heal our bodies, and even help us remediate environmental disaster. By examining fungi on their own terms, Sheldrake reveals how these extraordinary organisms—and our relationships with them—are changing our understanding of how life works. When Eden Carver, Iowa farm girl turned NY actress, decides to seduce the sexy cop next door, she begins to wonder if she's bitten off more than she can chew. The last thing Officer Jay Bennett wants is to cross a line with the sweet and innocent country girl—no matter how much he'd like to help himself to a nibble. Not only are they in the friendship zone, a naive girl like Eden doesn't belong in his dangerous world. But when she asks him to help her rehearse lines, and things go from simmer to boil, he finds himself doing the one thing he swore he'd never do. He knows he needs to walk away from temptation, but when sweet little Eden bites back, it tilts his world on its axis. Because biting back changes everything." After one sultry summer together, Dixie McCord's affair with Cole Ashton had grown chilly. Unable to stay with a man who put business before love, Dixie had left Napa, never expecting that one day she would return to Louret Vineyards—and once again feel the irresistible thrill of Cole's touch. Cole couldn't believe Dixie had agreed to work for him after their years apart, and he set plans in motion to seduce her. He'd fulfill all of his fantasies...and then leave her as she'd once left him. But the fire burned hotter with Dixie's every surrender, bringing her closer to his family's secrets...and his own melting heart. WHEN DANGER ARRIVES, REAL MEN TAKE ACTION Detective Andrew Logan hears that Detective Antonia Oliver is back in town. It's been four years since they were involved in a hot, heavy, and steamy affair. Andrew's life gets complicated when Toni is assigned as his new partner. Paired together, they try hard to ignore the sexual chemistry that's stronger than ever between them. One homicide investigation turns deadly and Toni's life is in danger. Andrew goes into action, determined to protect the woman he's trying his damndest not to fall in love with. " ... Two brave young women living at opposite ends of history are brought together by supernatural forces to do battle with a demon who travels through time. The fate of humanity rests in their hands ..."--Page 4 of cover. Josephine Wilder's torrid love affair is with Tangle Valley Vineyard, her family's legacy. She's grown up dreaming between the vines. She's always had secret ideas about how to make the place shine, so when it passes to her, Joey vows to make Tangle Valley everything she knows it can be. Her biggest obstacle? That overly commercial hotel going up, and the uppity manager trying to kill the vineyard's rustic charm. Becca Crawford loves to unwind with a good glass of wine. An astute businesswoman who has climbed the hospitality ladder, she's the perfect person to head up Elite Resorts' newest property, The Jade Hotel, and give tourists all the luxury they desire. As a bonus, The Jade is not far from the cutest vineyard with the best pinot she's ever tasted. If only the captivating owner would get on board with her plan and stop badmouthing the hotel to everyone in town. Is it possible that a nice glass of red could help Becca and Joey see each other in a new and alluring light? Quantum mechanics entails effects like superpositions and entanglement, which have no classical counterparts. From a technological standpoint these counterintuitive quantum aspects can be viewed as an unexploited resource that can be harnessed to support various tasks, e.g. in the domains of computation, communication, and metrology. In many applications, however, the potential of nonclassical states cannot practically be exploited due to detection inefficiencies. The authors address this limitation by experimentally realizing a novel detection scheme in which entangling interactions are time reversed. In this way, nonclassical many-particle states are disentangled, allowing them to be detected in a robust and technically feasible manner. In the context of quantum metrology, these nonlinear readout techniques extend the class of entangled probe states that can be leveraged for sensing applications without being limited by finite detector resolution. The authors present an active atom interferometer, where both the entangled state preparation and disentangling readout involve parametric amplification. This “SU(1,1)” interferometer is implemented with the help of spinor Bose–Einstein condensates, where amplification is implemented by atomic collisions leading to spin exchange. The Japanese air raids on Darwin on 19 February 1942 are well-known to most Australians, although not perhaps to the rest of the world. What happened afterwards, however, remains unknown to many. This publication attempts to illuminate this little-known period of war history, charting the exploits, losses and successes of the RAF's No 1 Fighter Wing and the contribution they made to the allied war effort. The stalwart Spitfire is celebrated in a narrative that is sure to appeal widely. For almost two years the airspace over North West Australia was routinely penetrated by Japanese raids, tallying about 70 in total. The 1942-43 air raids on Darwin constituted the only sustained and intensive direct assault on Australian mainland territory in the whole of World War II - and the whole history of post- 1788 Australia - yet, surprisingly, most Australians have no idea that it ever happened. And the rest of the world are yet more so in the dark. Telling the story of the RAF'S No 1 Fighter Wing, composed of both Australian and British Spitfire pilots, Darwin Spitfires explores the little known 1943 season of air combat over the top end, recovering important aspects of Australian history. It brings to the attention of the world the heroic exploits of the skilled pilots who did so much to protect Australia and support the Allied effort. This important publication attempts to celebrate and commemorate the spirit of solidarity that characterized the experiences of No 1 Fighter Wing. As featured in *Aeroplane Monthly* Zhu Xi (1130–1200) was the preeminent Confucian thinker of the Song dynasty (960–1279). His

teachings profoundly influenced China, where for centuries after his death they formed the basis of the country's educational system. In Korea, Japan, and Vietnam as well, elites embraced his inspired and authoritative synthesis of Confucian thought. In Zhu's eyes, the great Way of China was in decline, with its very survival threatened by external enemies and internal moral weakness. In his writings and teaching, Zhu took as his mission the revival of the Confucian tradition, the source of China's greatness, and its transmission to future generations. For him, restoring Confucianism to its rightful place required drawing on the tradition's whole sweep, from the sacred texts of the sages and worthies of antiquity to the more recent writings of the great thinkers of the tenth and eleventh centuries. This book presents the essential teachings of the new Confucian ("Neo-Confucian") philosophical system that Zhu Xi forged, providing a concise introduction to one of the most important figures in the history of Chinese thought. It offers selections from the Classified Conversations of Master Zhu (Zhuzi yulei), a lengthy collection of Zhu's conversations with disciples. In these texts, Zhu Xi reflects on the Confucian teachings of the past, revising and refining his understanding of them and shaping that understanding into a cohesive system of thought. Daniel K. Gardner's translation renders these discussions and sayings in a conversational style that is accessible to new and more advanced readers alike. This collection of more than 30 original patterns was inspired by Zentangle, a method of creating repetitive patterns that promotes relaxation as well as creative expression. The sweeping, free-form line designs incorporate flowers, stars, and geometric shapes. Pages are perforated and printed on one side only for easy removal and display. Specially designed for experienced colorists, Entangled and other Creative Haven® adult coloring books offer an escape to a world of inspiration and artistic fulfillment. At first, lawyer and ladies' man Craig Thibodeaux thought Madame LeBieu's chant was a strange bayou joke. But the voodoo worked and Craig is spending his days as...well, a small green frog. Now he has only two weeks to find love, or his new froggy transformation becomes permanent. When she receives the anonymous toxic water sample from Bayou Mist, research scientist Elaine Smith decides a trip to the bayou is the perfect excuse to escape the lab, and forget about her cheating ex-fiancé. Then she accidentally stumbles upon Craig's oh-so-fine naked form, and her science-nerd brain is overrun with naughty thoughts about her new gorgeous night-time bayou guide. But there's more to Bayou Mist than voodoo curses and sexy late-night trysts. Dark secrets threaten the delicate ecosystem, and there are those who would do anything to keep those secrets hidden.
