National Guide to a Preventive Health Assessment for Aboriginal and Torres Strait Islander People May 18 2022 This third edition continues that tradition and has new topics drawn from advice we received from Aboriginal Community Controlled Health Services and users of the National Guide. Our user survey resulted in 554 responses from general practitioners (GPs) and other healthcare providers across Australia. With this feedback, we were able to commission authors with expertise on topics such as child health and wellbeing and fetal alcohol spectrum disorder, as well as on other topics important to Aboriginal and Torres Strait Islander peoples. All the revised chapters were sent to external experts and relevant peak bodies across Australia. The support we have received in developing this National Guide has been phenomenal.

Teaching about Gender Diversity: Teacher-Tested Lesson Plans for K–12 Classrooms Sep 22 2022 Featuring lesson plans by educators from across North America, Teaching about Gender Diversity provides K–12 teachers with the tools to talk to their students about gender and sex, implement gender diversity–inclusive practices into their curriculum, and foster a classroom that welcomes all possible ways of living gender. The collection is divided into three sections dedicated to

the elementary, middle, and secondary grade levels, with each containing teacher-tested lesson plans for a variety of subject areas, including English language arts, the sciences, and health and physical education. The lesson plans range widely in terms of grade and subject, from early literacy read-alouds to secondary mathematics. Written by teachers for teachers, this engaging collection highlights educators' varied perspectives and specialized knowledge of pedagogical practices for the diverse contemporary classroom. Teaching about Gender Diversity is an ideal resource for teacher educators, teachers, and students taking education courses on equity, diversity, and social justice as well as curriculum and teaching methods. Visit the book's companion website at teachingaboutgenderdiversity.com.

A Standard Computable General Equilibrium (CGE) Model in GAMS Feb 27 2023 The purpose of this manual is to contribute to and facilitate the use of computable general equilibrium (CGE) models in the analysis of issues related to food policy in developing countries. The volume includes a detailed presentation of a static "standard" CGE model and its required database and incorporates features of particular importance in developing countries. The manual discusses the implementation of the model in GAMS and is accompanied by a CD-ROM that includes the GAMS software (free demo system), the GAMS input files for the model, sample databases, simulations, solution reports, and a social accounting matrix (SAM) aggregation program. Although the volume provides a standardized framework for analysis, the analyst is not forced to make "one-size-fits-all" assumptions. The GAMS code is written to give the analyst considerable flexibility in model specification.

Emerging Trends in Real Estate 2017 Oct 31 2020 Now in its 39th year, Emerging Trends in Real Estate is one of the most highly regarded and widely read forecast reports in the real estate industry. This updated edition of the annual examination of the commercial market provides an outlook on real

estate investment and development trends, real estate finance and capital markets, trends by property sector and metropolitan area, and other real estate issues around the globe. Comprehensive and invaluable, the book is based on interviews with leading industry experts and also covers what's happening in multifamily, retail, office, industrial, and hotel development.

Water for Food Water for Life Aug 09 2021 Managing water resources is one of the most pressing challenges of our times - fundamental to how we feed 2 billion more people in coming decades, eliminate poverty, and reverse ecosystem degradation. This Comprehensive Assessment of Water Management in Agriculture, involving more than 700 leading specialists, evaluates current thinking on water and its interplay with agriculture to help chart the way forward. It offers actions for water management and water policy - to ensure more equitable and effective use. This assessment describes key water-food-environment trends that influence our lives today and uses scenarios to explore the consequences of a range of potential investments. It aims to inform investors and policymakers about water and food choices in light of such crucial influences as poverty, ecosystems, governance, and productivity. It covers rainfed agriculture, irrigation, groundwater, marginal-quality water, fisheries, livestock, rice, land, and river basins. Ample tables, graphs, and references make this an invaluable work for practitioners, academics, researchers, and policymakers in water management, agriculture, conservation, and development. Published with IWMI.

Understanding Growth and Poverty May 06 2021 Provides an understanding of economic policies for poverty reduction in developing countries. The policy areas include the various roles of government in ensuring the effective operation of a market economy, conducting fiscal policy, and influencing the money supply, exchange rates, and the financial sector.

Fiscal Monitor, October 2017 Apr 05 2021 At the global level, inequality has declined substantially

over the past three decades, but within national boundaries, the picture is mixed: some countries have experienced a reduction in inequality while others, particularly advanced economies, have seen a significant increase that has, among other things, contributed to growing public backlash against globalization. Excessive levels of inequality can erode social cohesion, lead to political polarization, and ultimately lower economic growth, but whether inequality is excessive depends on country-specific factors, including the growth context in which inequality arises, along with societal preferences. This Fiscal Monitor focuses on how fiscal policy can help governments address high levels of inequality while minimizing potential trade-offs between efficiency and equity. It documents recent trends in income inequality, including inequality both between and within countries, then examines the redistributive role of fiscal policies over recent decades and underscores the importance of appropriate design to minimize any efficiency costs. It then focuses on some key components of fiscal redistribution: progressivity of income taxation, universal basic income, and public spending policies for achieving more equitable education and health outcomes. The analysis relies on the existing theoretical and empirical literature, IMF work on inequality and fiscal policy, country experiences, and new analytical work, including various static microsimulation analyses based on household survey data. Simulations using a dynamic general equilibrium model calibrated to country-specific data and behavioral parameters illustrate the potential impact of alternative budget-neutral tax and transfer measures on income inequality and economic growth.

An International Comparison of Corporate Governance Models Sep 10 2021

Measures of Spirituality/Religiosity—Description of Concepts and Validation of Instruments Dec 13

2021 Why do we need more questionnaires to measure aspects of spirituality/religiosity when we already have so many well-tried instruments in use? One answer is that research in this field is

growing and that new research questions continuously do arise. Several of these new questions cannot be easily answered with the instruments designed for previous questions. The field is expanding and, consequently, the research topics. Meanwhile several multidimensional instruments were developed which cover existential, prosocial, religious and non-religious forms of spirituality, hope, peace and trust—and several more. The ‘disadvantage’ of these instruments is the fact that some are conceptually broad and often rather unspecific, but they might be suited quite well for culturally and spiritually diverse populations when the intention is to compare such diverse groups. This is the reason why more research on new instruments is needed as can be found in this Special Issue, and to stimulate a critical debate about their pros and cons.

Advances in Software Engineering Nov 24 2022 As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines. FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications (ASEA), Bio-Science and Bio-Technology (BSBT), Control and Automation (CA), Database Theory and Application (DTA), Disaster Recovery

and Business Continuity (DRBC; published independently), Future Generation Communication and Networking (FGCN) that was combined with Advanced Communication and Networking (ACN), Grid and Distributed Computing (GDC), Multimedia, Computer Graphics and Broadcasting (MulGraB), Security Technology (SecTech), Signal Processing, Image Processing and Pattern Recognition (SIP), and u- and e-Service, Science and Technology (UNESST).

International Financial Management Oct 19 2019 International Financial Management provides a strong foundation for students' first encounter with the subject of international finance. As multinational corporations (MNCs) continue to expand their operations globally they must not only be properly managed to apply their comparative advantages in foreign countries, but must also manage their exposure to many forms and sources of risk. Those MNCs that are most capable of responding to changes in the international financial environment will be rewarded. The same can be said for today's students who become the MNC managers of the future. International Financial Management combines a strong foundation in international finance theory with current, practical applications. It provides thorough, up-to-date treatment of cutting-edge international finance issues along with traditional treatment of international financial management. This book, although it presumes an understanding of basic corporate finance, is renowned for its readability and clear explanation as well as its extensive use of hands-on, real-world applications and student-oriented pedagogy. It is suitable for both final-year undergraduate and master's level courses. The European edition replaces the majority of US examples in the text and questions with alternative UK and European examples. The default currency quoted in general examples is now Sterling or the euro rather than the US dollar. More-advanced topics have been added to extend the discussion, as well as specifically European issues such as the euro, European financial integration and the history of exchange rates.

Apex Legends: Pathfinder's Quest (Lore Book) Nov 12 2021 Explore the world of the hit game through the eyes of the lovable robot, Pathfinder, as he chronicles his journey throughout the various environs of the Outlands to interview his fellow Legends -- all in the hope of finally locating his mysterious creator. The rich history of Apex Legends is explained by the characters that helped to shape it, as are their unique bonds of competition and camaraderie.

Technologies, Artificial Intelligence and the Future of Learning Post-COVID-19 Oct 11 2021 This book aims to assess the experience of education during COVID-19 pandemic and explore the future of application of technologies and artificial intelligence in education. Education delivery requires the support of new technologies such as artificial intelligence (AI), the Internet of Things (IoT), big data, and machine learning to fight and aspire to new diseases. The academic community and those interested in education agree that education after the corona pandemic will not be the same as before. The book also questions the role of accreditation bodies (e.g., AACSB, etc.) to ensure the effectiveness and efficiency of technology tools in achieving distinguished education in times of crisis.

Who's Who in Science and Engineering 2008-2009 Nov 19 2019

Fiscal Monitor, April 2018 Sep 29 2020 This report discusses fiscal trends in policies aimed at reducing fiscal vulnerabilities and boosting medium-term growth, recent fiscal developments and the fiscal outlook in advanced economies, emerging markets, and low-income developing countries; recent trends in government debt and analysis of changes in fiscal balances, revenue, and spending; potential fiscal risks; and growth from the fiscal policies. It also describes how digitalization can help governments improve implementation of current policy and widen the range of policy options, and opportunities and risks for fiscal policy, including improvements in policy implementation, the design of future policy, and how digitalization can create opportunities for fraud and increase government

vulnerabilities.

Aroma Jun 26 2020 Smell is a social phenomenon, given particular meanings and values by different cultures. Odours form the building blocks of cosmologies, class hierarchies, and political odours. They can enforce social structures or transgress them, unite people or divide them, empower or disempower. The authors argue that the sociology of smell is repressed in the modern West, and its social history ignored. This book breaks the "olfactory silence" of modernity. It offers the first comprehensive exploration of the cultural role of odours in Western history - from antiquity to the present. It also covers a wide variety of non-Western societies. Its topics range from the medieval concept of the "odour of sanctity", to the aromatherapies of South America, and from olfactory stereotypes of gender and ethnicity in the modern West to the role of smell in postmodernity. Its subject matter will fascinate anyone who likes to nose around in the inner workings of culture.

World Development Report 2020 Jun 19 2022 Global value chains (GVCs) powered the surge of international trade after 1990 and now account for almost half of all trade. This shift enabled an unprecedented economic convergence: poor countries grew rapidly and began to catch up with richer countries. Since the 2008 global financial crisis, however, the growth of trade has been sluggish and the expansion of GVCs has stalled. Meanwhile, serious threats have emerged to the model of trade-led growth. New technologies could draw production closer to the consumer and reduce the demand for labor. And trade conflicts among large countries could lead to a retrenchment or a segmentation of GVCs. World Development Report 2020: Trading for Development in the Age of Global Value Chains examines whether there is still a path to development through GVCs and trade. It concludes that technological change is, at this stage, more a boon than a curse. GVCs can continue to boost growth, create better jobs, and reduce poverty provided that developing countries implement deeper reforms to

promote GVC participation; industrial countries pursue open, predictable policies; and all countries revive multilateral cooperation.

SERVICES-LED DEVELOPMENT Feb 21 2020

IoT Security Apr 17 2022 An up-to-date guide to an overview of authentication in the Internet of Things (IoT) The Internet of things (IoT) is the network of the countless physical devices that have the possibility to connect and exchange data. Among the various security requirements, authentication to the IoT is the first step to prevent the impact of attackers. IoT Security offers an important guide into the development of the many authentication mechanisms that provide IoT authentication at various levels such as user level, device level and network level. The book covers a wide range of topics including an overview of IoT and addresses in detail the security challenges at every layer by considering both the technologies and the architecture used. The authors—noted experts on the topic—provide solutions for remediation of compromised security, as well as methods for risk mitigation, and offer suggestions for prevention and improvement. In addition, IoT Security offers a variety of illustrative use cases. This important book: Offers an authoritative reference designed for use by all IoT stakeholders Includes information for securing devices at the user, device, and network levels Contains a classification of existing vulnerabilities Written by an international group of experts on the topic Provides a guide to the most current information available on IoT security Written for network operators, cloud operators, IoT device manufacturers, IoT device users, wireless users, IoT standardization organizations, and security solution developers, IoT Security is an essential guide that contains information on security features, including underlying networks, architectures, and security requirements.

Benchmarking Public Procurement 2016 Dec 25 2022 Public procurement accounts for around one-

fifth of global gross domestic product (GDP). Given its size the public procurement market can improve public sector performance, promote national competitiveness, drive domestic economic growth, and boost economic development. Launched at the request of the G20 Anti-Corruption Working Group, Benchmarking Public Procurement presents actionable indicators to help countries identify and monitor policies and regulations that impact how private sector companies do business with the government in 77 economies. The Benchmarking Public Procurement 2016 report is organized under two parts: the public procurement life cycle and the complaint and reporting mechanisms indicators. Data was gathered using standardized questionnaires distributed to expert contributors in each economy. The project builds on the Doing Business methodology and aims to promote evidence-based decision making by governments and shed light over areas where few empirical data have been presented so far.

Engine Repair (A1) Jan 02 2021 With comprehensive coverage of all topics, this book follows ASE guidelines to review a sample ASE test and prepare learners for certification. **KEY TOPICS:** Over 100 multiple-choice items duplicate the type of questions found on the ASE exam, and provide explanations of what makes each right answer correct and the wrong answers incorrect. The guide's practical, concentrated coverage focuses learning on topics that will be covered on the certification exam, and have been determined to be important by the ASE. An ASE task list enables readers to make the distinction between the need-to-know and nice-to-know information. **MARKET:** For individuals and distance learners preparing for ASE certification.

Applications of Networks, Sensors and Autonomous Systems Analytics Apr 24 2020 This book presents high-quality research papers presented at International Conference on Applications of Networks, Sensors and Autonomous Systems Analytics (ICANSAA 2020), held during December, 11

– 12, 2020, at JIS College of Engineering, Kalyani, West Bengal, India. The major topics covered are cyber-physical systems and sensor networks, data analytics and autonomous systems and MEMS and NEMS with applications in biomedical devices. It includes novel and innovative work from experts, practitioners, scientists, and decision-makers from academia and industry.

A New View of a Woman's Body Dec 01 2020

The Graylands Story Jan 26 2023

Opera in Seventeenth-Century Venice May 26 2020 "In this elegantly constructed study of the early decades of public opera, the conflicts and cooperation of poets, composers, managers, designers, and singers—producing the art form that was soon to sweep the world and that has been dominant ever since—are revealed in their first freshness."—Andrew Porter "This will be a standard work on the subject of the rise of Venetian opera for decades. Rosand has provided a decisive contribution to the reshaping of the entire subject. . . . She offers a profoundly new view of baroque opera based on a solid documentary and historical-critical foundation. The treatment of the artistic self-consciousness and professional activities of the librettists, impresarios, singers, and composers is exemplary, as is the examination of their reciprocal relations. This work will have a positive effect not only on studies of 17th-century, but on the history of opera in general."—Lorenzo Bianconi

Handbook of Wireless Sensor Networks: Issues and Challenges in Current Scenario's Feb 15 2022

This book explores various challenging problems and applications areas of wireless sensor networks (WSNs), and identifies the current issues and future research challenges. Discussing the latest developments and advances, it covers all aspects of in WSNs, from architecture to protocols design, and from algorithm development to synchronization issues. As such the book is an essential reference

resource for undergraduate and postgraduate students as well as scholars and academics working in the field.

Economies of Abandonment Dec 21 2019 Examines how alternative social worlds and projects generate new possibilities of life in the context of ordinary and extraordinary acts of neglect and surveillance

Measures of Spirituality/Religiosity (2018) Jan 22 2020 The interest in the topic of spirituality as a more or less independent dimension of quality of life is continuously growing, and research questions are beginning to change as the field of religiosity changes, becoming more diverse and pluralistic. Addressing new topics in health research also relies on standardized questionnaires. The number of instruments intended to measure specific aspects of spirituality is growing, and it is particularly difficult to evaluate the new instruments. This Special Issue will focus on some of the established instruments (updating them to different languages and cultures), but will also describe the features and intentions of newly-developed instruments, which may potentially be used in larger studies to develop knowledge relevant to spiritual care and practice. This Special Issue will serve as a resource on the instruments used to study the wide range of organized religiosity, the individual experience of the divine, and an open approach in the search for meaning and purpose in life.

The Activator Method - E-Book Jul 20 2022 From basic scan protocols to advanced assessment procedures, **THE ACTIVATOR METHOD**, 2nd Edition discusses the Activator Method Chiropractic Technique (AMCT) in an easy-to-understand, how-to approach. This updated 2nd edition covers all aspects of the controlled low-force analytical and adjusting system, from the history of the technique to in-depth examinations of body structures. It also features expanded content on supportive subjects from seven new contributors, discussing topics such as activator and instrument adjusting history,

instrument reliability in the literature, the neurology of pain and inflammation, temporal mandibular disorders, and leg length reactivity. UNIQUE! As the only Activator Method textbook in the field, it is known as the standard reference in Activator. Expert author, Dr. Arlan Fuhr, is a co-founder of the AMCT, bringing his unparalleled expertise to the subject. Brand new full-color photos detail assessment procedures, specific anatomical contact points, and lines of drive to clearly show procedures for easier learning. Clinical Observations boxes share the author's knowledge from years of experience and provide tips on analysis of certain conditions and suggestions for atypical cases. Summary tables in each clinical chapter allow you to quickly access pertinent information. Step-by-step instruction throughout the Instrumentation section helps you understand the principles of the technique. Appendix: Activator Quick Notes for Basic and Advanced Protocol provides at-a-glance reviews of important points and things to remember when performing basic and advanced protocols. A new chapter on leg length analysis procedures offers comprehensive coverage of this critical step in using the Activator Method. Seven new contributors bring fresh insight to AMCT.

Progresses in Artificial Intelligence and Neural Systems Jul 28 2020 This book provides an overview of the current advances in artificial intelligence and neural nets. Artificial intelligence (AI) methods have shown great capabilities in modelling, prediction and recognition tasks supporting human-machine interaction. At the same time, the issue of emotion has gained increasing attention due to its relevance in achieving human-like interaction with machines. The real challenge is taking advantage of the emotional characterization of humans' interactions to make computers interfacing with them emotionally and socially credible. The book assesses how and to what extent current sophisticated computational intelligence tools might support the multidisciplinary research on the characterization of appropriate system reactions to human emotions and expressions in interactive

scenarios. Discussing the latest recent research trends, innovative approaches and future challenges in AI from interdisciplinary perspectives, it is a valuable resource for researchers and practitioners in academia and industry.

Advances in Design, Simulation and Manufacturing II Oct 23 2022 This book reports on topics at the interface between manufacturing, mechanical and chemical engineering. It gives special emphasis to CAD/CAE systems, information management systems, advanced numerical simulation methods and computational modeling techniques, and their use in product design, industrial process optimization and in the study of the properties of solids, structures, and fluids. Control theory, ICT for engineering education as well as ecological design, and food technologies are also among the topics discussed in the book. Based on the 2nd International Conference on Design, Simulation, Manufacturing: The Innovation Exchange (DSMIE-2019), held on June 11-14, 2019, in Lutsk, Ukraine, the book provides academics and professionals with a timely overview and extensive information on trends and technologies behind current and future developments of Industry 4.0, innovative design and renewable energy generation.

Principals as Literacy Leaders Jan 14 2022 Research findings from the Principals as Literacy leaders (PALL) pilot project.

The Music Division Aug 21 2022

Global Investment Competitiveness Report 2019/2020 Mar 16 2022 The Global Investment Competitiveness Report 2019-2020 provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around "3 ICs" - they provide guidance to governments on how to increase investments' contributions to their country's

development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens-including more and better-paid jobs-but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters: Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations (i.e. brownfield FDI), and domestically-owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment and wages, using case study evidence from Ethiopia, Turkey and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies.

Document Quality Control in Public Administrations and International Organisations Aug 29 2020 "The development of document quality control (DQC) policies is a continuous process that needs

constant adjustment. An overall dynamic approach must be followed to understand current practices and to outline possible improvements. The present study adopts both a theoretical and a comparative perspective."--Editor.

English Collocation in Use. Per Le Scuole Superiori Feb 03 2021 Collocations are combinations of words which frequently appear together. Using them makes your English sound more natural. Presents and explains approximately 1,500 word combinations in typical contexts using tables, charts, short texts and dialogues.

Advances in Simulation and Digital Human Modeling Jun 07 2021 This book presents the latest advances in modeling and simulation for human factors research. It reports on cutting-edge simulators such as virtual and augmented reality, multisensory environments, and modeling and simulation methods used in various applications, including surgery, military operations, occupational safety, sports training, education, transportation and robotics. Based on two AHFE 2020 Virtual Conferences such as the AHFE 2020 Virtual Conference on Human Factors and Simulation and the AHFE 2020 Virtual Conference on Digital Human Modeling and Applied Optimization, held on July 16–20, 2020, the book serves as a timely reference guide for researchers and practitioners developing new modeling and simulation tools for analyzing or improving human performance. It also offers a unique resource for modelers seeking insights into human factors research and more feasible and reliable computational tools to foster advances in this exciting field.

Yearbook of International Organizations 2014-2015, Volumes 1A And 1B (SET) Mar 04 2021 Volume 1 (A and B) covers international organizations throughout the world, comprising their aims, activities and events.

COVID-19 and Higher Education in the Global Context Jul 08 2021 COVID-19 and Higher Education

in the Global Context: Exploring Contemporary Issues and Challenges addresses the lasting impact of the novel coronavirus (COVID-19) in the higher education sector and offers insights that inform policy and practice. Framed in a global context, this timely book captures a wide variety of topics, including student mobility, global partnerships and collaboration, student health and wellbeing, enrollment management, employability, and graduate education. It is designed to serve as a resource for scholar-practitioners, policymakers, and university administrators as they reimagine their work of comparative and international higher education in times of crisis. The collection of chapters assembled in this volume calls for a critical reflection on the opportunities and challenges that have emerged as a result of the global pandemic and provides as a basis for how tertiary education systems around the world can learn from past experiences and shared viewpoints as institutions recalibrate operations, innovate programs, and manage change on their respective campuses.
