Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared holiday can have multiple traditions and be celebrated in all sorts of ways.

Somersworth, New Hampshire, is a city which has grown in many ways since it was first designated a town in 1754. When the Great Falls Manufacturing Company was established on the banks of the Salmon Falls River in 1822, Somersworth was thrust into the Industrial Revolution. This had a tremendous economic and social impact on the area and led to Somersworth's proud identity as a hardworking and dynamic mill town. Collected in this fascinating visual history are over 200 photographs which together reflect the rich and diverse history of Somersworth and the nearby towns of Rollinsford and Berwick from the early industrial age to 1960s. In these images can be seen the roots of the purpose, pride, and community spirit which today help Somersworth adapt to the changes of the twentieth century. **MUSTANG ACE** *Memoirs of a P-51 Fighter Pilot* by Robert J. Goebel When Robert Goebel left home to join the Army Air Corps in 1942, he was a 19 years old and a high-school graduate. The only previous time he had traveled far from his native Racine, Wisconsin, was an epic trip in the summer of 1940, when he and a pal had ridden the rails to Texas and back to visit two of Bob's brothers who were in the service. Even during his weeks in Pre-flight training, young Goebel found that he felt at home in the service, and he looked forward to the great adventure on which he had embarked out of a sense of patriotism and yearning to see the wide world. Easygoing and quick to learn, Cadet Goebel worked his way steadily through the Basic, Primary, and Advanced phases of military flight training, and found in himself an aptitude for flight. However, like nearly all of his comrades, Goebel could not learn how to hit a flying target with the guns mounted on the trainers he flew. Nevertheless, he and they graduated to fighter school and, after earning their wings and commissions, were sent on to join an operational fighter unit - in

Panama. The months of rigorous operational flying in Panama seasoned Lieutenant Goebel and his young companions, and made better aviators of them, but it did little to advance their gunnery skills. When a new crop of novices arrived, Goebel and his companions found themselves on their way to Europe to join the fight. They wound up in North Africa in the Spring of 1944 with orders to join the 31st Fighter Group in Italy. Just as Goebel and his young companions were about to join the leading fighter group in the Mediterranean Theater of Operations, the 31st turned in its British-made Spitfire fighters for new P-51 Mustang fighters. Within weeks, Bob Goebel had flown his first combat missions and had lost his element leader, who was shot down in a swirling dogfight. But master the job he did. A steady succession of bomber-escort missions over southeastern Europe slowly and then more rapidly forced Lieutenant Goebel to settle in and master aerial gunnery and the mentally taxing high-speed dogfights in which he became engaged. At last, he shot down his first German fighter. And he advanced to positions of leadership, in due course leading the entire 31st Fighter Group deep into enemy territory. At length, he shot down a fifth German and thus became an ace-a Mustang Ace. And then he shot down three Germans in one day on a mission to Ploesti, Rumania. He flew to Russia and back, and supported the invasion of southern France. In the end, by September 1944, he had eleven confirmed victories to his credit and was one of the 308th Fighter Squadron's most respected combat leaders. When he was sent home at the end of his combat tour, Captain Bob Goebel was not yet 22 years old. A book about Dissociative Identity Disorder, written for young alters. The book helps young alters understand their experiences as part of a multiple system. "Rifles, handguns, shotguns, muzzleloaders, ammo, optics"--Cover. Stanley Meyer was an independent inventor and former NASA employee who designed and built a motor that ran completely on water, highlighting his technology with a water-powered dune buggy. His revolutionary car was recorded many times on film and Television. Meyer was recognized by national and international organizations, and was elected inventor of the year in "Who's Who of America" in 1993. This printing is from Public Domain. Stratton formed in 1908, Briggs & Stratton has evolved into an industry leader whose name is synonymous with the lawn mower engines it pioneered. *The Legend of Briggs & Stratton*, 208 pages, is filled with 125 color and 145 black & white images covering Briggs & Stratton's fascinating history. Explanations of the mechanisms and kinetics of martensitic transformations and behavior of martensitic materials (such as shape memory alloys and high performance steels) form the backbone of this collection of reviews honoring materials

science pioneer Morris Cohen of MIT. Among the topics: thermodynamics Alene's love/hate relationship with boat racing is at the center of this comprehensive history of the Diamond Cup race for unlimited hydroplanes. The early origins of competitive boat racing on Coeur d'Alene Lake, the backstory of the how the small lakeside community came to host ten years of the Diamond Cup, the true story of the civil disturbances that would cast a lasting pawl on the event, the real reasons behind the decision to stop hosting the races, and the drama and controversy that led to the races being banned from the city are all covered in depth. The stories of the civic leaders, race volunteers, boat owners, drivers, and other key individuals that came together to put on the exciting spectacle that was the Diamond Cup are lovingly recounted. Of interest to boat racing fans and those curious about one of the premier sporting events in the history of North Idaho. Illustrated with over 100 photographs. "Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text."-- "In this volume I have collected all the essays on wild bees scattered through the *Souvenirs entomologiques*, with the exception of those on the mason-bees."--Translator's note. **MECHANICS OF MATERIALS** - an extensive revision of **STRENGTH OF MATERIALS**, Fourth Edition, by Pytel and Singer - covers all the material found in other *Mechanics of Materials* texts. What's unique is that Pytel and Kiusalaas separate coverage of basic principles from that of special topics. The authors also apply their time-tested problem solving methodology, which incorporates outlines of procedures and numerous sample problems to help ease students' transition from theory to problem analysis. The result? Your students get the broad introduction to the field that they need along with the problem-solving skills and understanding that will help them in their subsequent studies. To demonstrate, the authors introduce the topic of beams using ideal model as being perfectly elastic, straight bar with a symmetric cross section in ch. 4. They also defer the general transformation equations for stress and strain (including Mohr's Circle) until the students have gained experience with the basics of simple stress and strain. Later, more complicated applications of the principles such as energy methods, inelastic behavior, stress concentrations, and unsymmetrical bending are discussed in ch. 11 - 13 eliminating the need to skip over material when teaching the basics.
