By continually challenging the reader to answer probing questions throughout the book, the Move by Move format greatly encourages the learning and practising of vital skills just as much as the traditional assimilation of opening knowledge. Carefully selected questions and answers are designed to keep you actively involved and allow you to monitor your progress as you learn. This is an excellent way to study any chess opening and at the same time improve your general chess skills and knowledge. Bird's Opening, 1 f4, is an ideal choice for freethinking chess players who prefer to rely on their general chess knowledge and intuition rather than having to memorize and keep up to date with mainline opening theory. Bird's Opening is essentially the Dutch Defence with an extra move, and White can choose between a number of different set-ups, including the reversed Leningrad, Classical and Stonewall variations, depending on mood and opponents' responses. In this book, International Master Cyrus Lakdawala examines all the important variations of Bird's Opening, including the sharp From's Gambit. Using illustrative games, he explains the main positional and tactical ideas for both sides, provides answers to all the key questions and tells you everything you need to know about successfully playing 1 f4. Documentary filmmaker Alice Lindstedt has been obsessed with the vanishing residents of the

old mining town, dubbed "The Lost Village," since she was a little girl. In 1959, her grandmother's entire family disappeared in this mysterious tragedy, and ever since, the unanswered questions surrounding the only two people who were left—a woman stoned to death in the town center and an abandoned newborn—have plagued her. She's gathered a small crew of friends in the remote village to make a film about what really happened. But there will be no turning back. Not long after they've set up camp, mysterious things begin to happen. Equipment is destroyed. People go missing. As doubt breeds fear and their very minds begin to crack, one thing becomes startlingly clear to Alice: They are not alone. They're looking for the truth... But what if it finds them first? Pearls of Power reviews the social science that explains our implicit, instinctual appraisal of people, and how these subliminal automatic appraisals influences choices in elections and in the workplace in the selection of leaders. This book focuses on a limited but critical

aspect of leadership – how to get the role. It is not a book on leadership skills, but rather on how to look that part, as this is essential for gaining access to leadership roles. Citing hundreds of scientific studies, Dr. Lewis explains how subtle characteristics in the candidate's appearance affect voter behavior sufficiently to move election results by several percentage points; enough to swing most competitive elections. These same characteristics influence how we are perceived in the workplace and greatly impact hiring and promotion into leadership roles. Pearls of Power then outlines the steps a candidate can take to improve the way they are perceived by others, and how to make subtle changes in their appearance that increase the perception of competence, capacity and strength. Since most voters never meet the candidate, photos have a crucial influence on elections. Pearls of Power describes how to use different camera lenses, lighting, and camera angle can change how we are perceived, and how different persons can highlight or minimize aspects of their appearance to best present themselves. Although any political or job candidate may benefit from the advice provided in Pearls of Power, it is written with women in mind. There are chapters on how to use cosmetics, jewelry, accessories, and on hair and clothing styles that best present the candidate. The book provides guidance on how the candidate can best present themselves when interviewed on radio or television, and gives advice on what not to wear on live camera. Pearls of Power counsels the reader on how they can develop a persona with executive presence so that others perceive them as leaders, in order to give the reader a greater voice and more powerful role, both in society and in their careers. Against her better judgment, she enters an antique store...just to look around she tells herself. However, what woman can just window shop? Certainly not Candice. With her newly purchased hat, she leaves the store in the direction of her new life. One gust of wind grabs the hat carrying it down the street. When the hat finally comes to rest on the porch of a Victorian house, the For Sale sign on the window intrigues her to imagine the possibilities. Once Grandma Pela enters her life, things start to change as Candice dreams of her future. Below is Candice's Smyth's Secret Recipe that she follows. Here's What's Cookin':

To make the journey into the Now we will need to leave our analytical mind and its false created self, the ego, behind. From the very first page of Eckhart Tolle's extraordinary book, we move rapidly into a significantly higher altitude where we breathe a lighter air. We become connected to the indestructible essence of our Being, "The eternal, ever present One Life beyond the myriad forms of life that are subject to birth and death." Although the journey is challenging, Eckhart Tolle uses simple language and an easy question and answer format to guide us. A word of mouth phenomenon since its first publication, *The Power of Now* is one of those rare books with the power to create an experience in readers, one that can radically change their lives for the better. Building on the work of Daniel Kahneman (*Thinking Fast and Slow*), Dan Ariely (*Predictably Irrational*), Shaw and Hamilton provide a new understanding of how people behave, explain what it means for organizations who really want to understand their customers, and show you what to do to create exceptional customer experiences. *Chasing Vermeer* joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content! When a book of unexplainable occurrences brings Petra and Calder together, strange things start to happen: seemingly unrelated events connect; an eccentric old woman seeks their company; an invaluable Vermeer painting disappears. Before they know it, the two find themselves at the center of an international scandal, where no one is spared from suspicion. As Petra and Calder are drawn clue by clue into a mysterious labyrinth, they must draw on their powers of intuition, their problem solving skills, and their knowledge of Vermeer. Can they decipher a crime that has stumped even the FBI? *Evidence of Things Not Seen: Fantastical Blackness in Genre Fictions* is an interdisciplinary study of blackness in genre literature of the Americas. The "fantastical" in fantastical blackness is conceived by an unrestrained imagination because it lives, despite every attempt at annihilation. This blackness amazes because it refuses the limits of anti-blackness. As put to work in this project, fantastical blackness is an ethical praxis that centers black self-knowledge as a point of departure rather than as a reaction to threatening or diminishing dominant narratives. Mystery, romance, fantasy, mixed-genre, and science fictions' unrestrained imaginings profoundly communicate this quality of blackness, specifically here through the work of Barbara Neely, Colson Whitehead, Nalo Hopkinson, and Colin Channer. When black writers center this expressive quality, they make fantastical blackness

available to a broad audience that then uses its imaginable vocabularies to reshape extra-literary realities. Ultimately, popular genres' imaginable possibilities offer strategies through which the made up can be made real.

"VOCABULARY 1 is a book that avoids the pitfalls of teaching obscure words. It presents words that have use in the real world. It requires that you learn only 10 words per lesson and furnishes you with what you need to know about using the words." -- Preface.

The third book of the Tuatha de Danaan series: *The Key to Clonacool* A Magical Irish Romance that answers the beckoning dreams of contemporary women. Mist above a faerie circle, a full moon, and a Prince of the mythical Tuatha de Danaan draws a young woman to her destiny, where she may choose eternal youth but must leave behind all that she loves. The Formorians, long arch enemies of the Tuatha de Danaan and indeed of the Irish people themselves, mischievously sew a blight, intended to destroy all farming livestock. Disease rages relentlessly across the land, causing the politicians argue extreme measures of animal control while the farmers mourn their stricken creatures and plead for a solution to save them. Aoife, now a young woman, has consistently denied her heritage as a child of the Tuatha de Danaan. She now realizes that if the animals are to be rescued she must become part of the solution. To do this, she will have to undertake the journey her mother took fifteen years previously, into the realms of Tir na Nog from where she never returned. On the Night of Nights, under the Moon of Moons, Aoife gathers her courage, walking into the darkness of the portal, to where she will confront both her past and her future.

Series Praise: -- "This book is enchanting!! I felt like I was transported into a land of magic, mysteries and such love!! I could not put this book down!! I read it in one day!!!! like Kay. I think you do a great job in allowing us to really know her... what she is thinking, how she feels and even the fact that she is so unsure of herself at times!! After all, don't we all feel that way at times? Breathlessly awaiting the sequel :-)" -- 5 Star Review from Nana2seven -- "Carole is a great story teller as I found out when read the first book in the Tuatha De Danaan series. This is the second book in the series and I'm so glad I bought both books together. In this book, we meet Aiofe, Kay's daughter as well as the rest of the characters who all play a vital role in the tale. This story is a mix of happiness and tragedy, and although it is a complete book in itself, it has left me hungering for the third installment. Carole, please get writing! :-)" -- 5 Star Review from Phoebe Wilby -- "Wonderfully written and captivating read." -- 5 Star Review from A. Masten -- "Fantasy, romance, Irish folktale, what else could you ask for? I was captivated from the first chapter. The Irish accents read so well in my head. I enjoyed this book so much I bought extra copies for my family members!" -- 5 Star Review from Ariel -- "Ms. Mondragon brought me back to the Ireland of my

childhood where every corner hid faeries, magic and mystery. This book is easy to get into and flows nicely. It's really hard to put down." -- 5 Star Review from Sheila Moody Don't forget to check out the other books from this series -- Book The Mists of Clonacool Book 2: The Secret of Clonacool NEW YORK TIMES BESTSELLER WALL STREET JOURNAL BESTSELLER "Sprint offers a transformative formula for testing ideas that works whether you're at a startup or a large organization. Within five days, you'll move from idea to prototype to decision, saving you and your team countless hours and countless dollars. A must read for entrepreneurs of all stripes." --Eric Ries, author of The Lean Startup From three partners at Google Ventures, a unique five-day process for solving tough problems, proven at more than a hundred companies.

Entrepreneurs and leaders face big questions every day: What's the most important place to focus your effort, and how do you start? What will your idea look like in real life? How many meetings and discussions does it take before you can be sure you have the right solution? Now there's a surefire way to answer these important questions: the sprint. Designer Jake Knapp created the five-day process at Google, where sprints were used on everything from Google Search to Google X. He joined Braden Kowitz and John Zeratsky at Google Ventures, and together they have completed more than a hundred sprints with companies in mobile, e-commerce, healthcare, finance, and more. A practical guide to answering critical business questions, Sprint is a book for teams of any size, from small startups to Fortune 100s, from teachers to nonprofits. It's for anyone with a big opportunity, problem, or idea who needs to get answers today. Prepares students for the new standards and the commencement level PS/Earth Science Test. Challenges with content-based, multiple choice, short and extended constructed-response questions. Features process skills activities in information systems, interconnectedness, and interdisciplinary problem solving. Correlates PS/Earth Science key ideas on Earth dimensions, rocks and minerals, dynamic crust, surface processes, water cycle and climate, astronomy, and environmental awareness. Fosters mastery with practice on four recent tests for practice.

Americans have always put the past to political ends. The Union laid claim to the Revolution--so did the Confederacy. Civil rights leaders said they were the true sons of liberty--so did Southern segregationists. This book tells the story of the centuries-long struggle over the meaning of the nation's founding, including the battle waged by the Tea Party, Glenn Beck, Sarah Palin, and evangelical Christians to "take back America." Jill Lepore, Harvard historian and New Yorker staff writer, offers a careful and concerned look at American history according to the far right, from the "rant heard round the world," which launched the Tea Party to the Texas School Board's adoption of a social-studies curriculum that teaches

that the United States was established as a Christian nation. Along the way, she provides rare insight into the eighteenth-century struggle for independence--a history of the Revolution, from the archives. Lepore traces the roots of the far right's reactionary history to the bicentennial in the 1970s, when no one could agree on what story a divided nation should tell about its unruly beginnings. Behind the Tea Party's Revolution, she argues, lies a nostalgic and even heartbreaking yearning for an imagined past--a time less troubled by ambiguity, strife, and uncertainty--a yearning for an America that never was. *The Whites of Their Eyes* reveals that the far right has embraced a narrative about America's founding that is not only a fable but is also, finally, a variety of fundamentalism--anti-intellectual, antihistorical, and dangerously antipluralist. In a new afterword, Lepore addresses both the recent shift in Tea Party rhetoric from the Revolution to the Constitution and the diminished role of scholars as political commentators over the last half century of public debate. No idea what you're doing? No problem. Good managers are made, not born. Top tech executive Julie Zhuo remembers the moment when she was asked to lead a team. She felt like she'd won the golden ticket, until reality came crashing in. She was just 25 and had barely any experience being managed, let alone managing others. Her co-workers became her employees overnight, and she faced a series of anxiety-inducing firsts, including agonising over whether to hire an interviewee; seeking the respect of reports who were cleverer than her; and having to fire someone she liked. Like most first-time managers, she wasn't given any formal training, and had no resources to turn to for help. It took her years to find her way, but now she's offering you the short-cut to success. This is the book she wishes she had on day one. Here, she offers practical, accessible advice like: · Don't hide thorny problems from your own manager; you're better off seeking help quickly and honestly · Before you fire someone for failure to collaborate, figure out if the problem is temperamental or just a lack of training or coaching · Don't offer critical feedback in a 'compliment sandwich' - there's a better way! Whether you're new to the job, a veteran leader, or looking to be promoted, this is the handbook you need to be the kind of manager you've always wanted. NATIONAL BESTSELLER • From the bestselling author of *The Night Circus*, a timeless love story set in a secret underground world—a place of pirates, painters, lovers, liars, and ships that sail upon a starless sea. Zachary Ezra Rawlins is a graduate student in Vermont when he discovers a mysterious book hidden in the stacks. As he turns the pages, entranced by tales of lovelorn prisoners, key collectors, and nameless acolytes, he reads something strange: a story from his own childhood. Bewildered by this inexplicable book and desperate to make sense of how his own life came to be recorded, Zachary uncovers a series of clues—a be

a key, and a sword—that lead him to a masquerade party in New York, to a secret club, and through a doorway to an ancient library hidden far below the surface of the earth. What Zachary finds in this curious place is more than just a buried home for books and their guardians—it is a place of lost cities and seas, lovers who pass notes under doors and across time, and of stories whispered by the dead. Zachary learns of those who have sacrificed much to protect this realm, relinquishing their sight and their tongues to preserve this archive, and also of those who are intent on its destruction. Together with Mirabel, a fierce, pink-haired protector of the place, and Dorian, a handsome, barefoot man with shifting alliances, Zachary travels the twisting tunnels, darkened stairwells, crowded ballrooms, and sweetly soaked shores of this magical world, discovering his purpose—in both the mysterious book and in his own life.

This poker workbook has one goal: to help you actually improve between sessions. By learning powerful concepts and drilling through exercises, your ability to calculate accurately and quickly at the tables improves. Your time at the tables shouldn't be spent trying to calculate pot odds of a call or the breakeven-% of your bluffs. Calculations like these should be automatic, giving you extra time and brainpower to find ways to optimize your edge during a hand. Now you can practice the math that underlies

all aspects of your poker strategy. Drill through the technical side of your preflop playbook. And start putting a bigger gap between your winrate and the regs in your game. This workbook teaches you the formulas and lays out practice exercises for concepts like: Equity Range Building/Hand Reading Combos & Blockers Pot Odds Implied Odds Breakeven % & Auto-Profit Expected Value (EV) Open-Raising 3Betting & 4Betting Preflop All-Ins By learning these simple formulas and practicing them at your own pace, you'll find poker math getting faster and easier. You don't need an IQ of 175 to master poker math - you just need some guidance, some shortcuts, and some in-depth training. Complete just a few pages per day, and you'll see serious improvement in the next month. And the best news is that these concepts come into play in every single session, at every single level, and wherever you happen to play poker. So the examples in this book range from live cash games to online tournaments - without bogging you down with confusing variables that will never apply to the poker games you play. The Answer Key Based upon feedback from previous workbooks, there is an included answer key so you can double-check your answers at any point. There is a link on Page #246 so you can download the answer key OR use the online version that will get lifetime updates. This key also includes all of the range strands, making it easy to copy ranges from the workbook and paste them directly into your poker software. Is This Workbook For You? We all have to start somewhere, and no one is born with technical poker knowledge imprinted in the brain. So truthfully answer each of these: Can you look at a range and correctly estimate its %-form and number of combos? If not, then this book is for you. Do you know how often a player would fold if you 3bet or squeezed them? If not, then this book is for you. Do you know how many combos of AQ a player can have on AQ4 when you hold AKs? If not, this book is for you. Do you know how much extra money you need to make when you have 15% equity and are getting 3:1 on a turn call? If not, then this book is for you. Do you know how often you can expect both the blinds to fold when you raise from the button? If not, this book is for you. Do you know how much equity AKs has against a range of QQ+/AK? If not, this book is for you. Are you 100% confident in your poker math skills yet? If not, then this book is for you. No more excuses. No more confusion when it comes to the core poker math. And no more reasons for skipping another study session. Pick up the Preflop & Math Poker Workbook and start seeing your strategy the right way. Good luck! The spiral design on the cover/back is purely decoration. Unfortunately, spiralbound printing is not an available option at this time. Written for a young audience, this intense memoir explores the harsh realities of life on the streets in contemporary North Korea. Every Falling Star is the memoir of Sungju Lee, who at the age of twelve was forced to live on the

streets of North Korea and fend for himself. To survive, Sungju creates a gang and lives by thieving, fighting, begging, and stealing rides on cargo trains. Sungju richly recreates his scabrous story, depicting what it was like for a boy alone to create a new family with his gang, "his brothers," to daily be hungry and to fear arrest, imprisonment, and even execution. This riveting memoir allows young readers to learn about other cultures where freedoms they take for granted do not exist. Contains eight mini-biographies written in a high interest, magazine style format (three to four pgs. each) on well-known American artists in the rock music scene - six individual performers: John Cougar Mellencamp, Janet Jackson, Bon Jovi, Bruce Springsteen, Whitney Houston and Madonna; and, two groups, The Bangles and Los Lobos. At age twelve, Sophie learns that the remarkable abilities that have always caused her to stand out identify her as an elf, and after being brought to Eternalia to hone her skills, discovers that she has secrets buried in her memory for which some would kill.
