The dissertation studies sixteenth-century German artists' manuals (Kunstbüchlein), a new kind of book that addresses certain types of artistic practices. The Kunstbüchlein testify to and shape transformations of knowledge in early modern Europe. Disseminating practical knowledge in printed form, they endowed craft know-how with a form of authority until then reserved for the liberal arts. They aimed also to reconcile theoretical and practical knowledge, what Albrecht Dürer (the crucial forerunner to the authors of the Kunstbüchlein) termed respectively Kunst and Brauch. Authors Sebald Beham, Heinrich Voghterr, Heinrich Lautensack, and Erhard Schön sought to provide accessible, useful knowledge. Focused on a limited set of topics, they pretended to be closer to practice and to respond more effectively to the needs of their apprentices than Dürer and others in their publications. In fact, the Kunstbüchlein did not mediate Brauch, but show instead what their authors understood Brauch to be. Emphasizing the hands-on acquisition of knowledge through looking, reading, and doing, the Kunstbüchlein placed the printed image, whether as schematic diagram or finished illustration, at the core of the didactic process. Offers expert advice on selling handmade creations online, covering such topics as building an online presence, creating a business plan, writing copy, developing a marketing strategy, and

advertising through social media. Explores the elements of fiction, providing practical writing techniques and examples. Written in a tone that is personal and non-prescriptive, this book encourages students to develop proficiency through each step of the writing process. It also integrates diverse, contemporary short stories in every chapter. Experience the fascination and folklore of Japan by using common household items to re-create traditional crafts like kokeshi dolls and origami cranes. Learn legends that promise good fortune as you sculpt a Beckoning Cat or paint a blind Daruma. Celebrate holidays as the Japanese do by cooking mochi and moon-viewing noodles, or by painting a seasonal sumi-e poem. Japan is a nation that honors tradition, yet it is among the world's most technologically advanced countries. The Japanese enjoy the longest life spans of any people on earth, a fact believed to be greatly due to their diet. See how the people of this crowded land came to depend on the sea surrounding them for sustenance, then try your hand at making teriyaki salmon and ozoni, a soup that features shrimp. Step into the pages of this book to share Japanese culture, with its love of nature and expression of art in daily life. What is karma? Most people understand karma as a balance sheet of good and bad deeds, virtues and sins. The mechanism that decrees that we cannot evade the consequences of our own actions. In reality, karma has nothing to do with reward and punishment. Karma simply means action: your action, your responsibility. It isn't some external system of crime and punishment, but an internal cycle generated by you. Accumulation of karma is determined only by your intention and the way you respond to what is happening to you. Over time, it's possible to become ensnared by your own unconscious patterns of behavior. In *Karma*, Sadhguru seeks to put you back in the driver's seat, turning you from a terror-struck passenger to a confident driver navigating the course of your own destiny. By living consciously and fully inhabiting each moment, you can free yourself from the cycle. *Karma* is an exploration and a manual, restoring our understanding of karma to its original potential for freedom and empowerment instead of a source of entanglement. Through Sadhguru's teachings, you will learn how to live intelligently and joyfully in a challenging world. Brief, practical, and wonderfully readable, *The Art and Craft of Fiction* gives aspiring writers all they need — in under 400 pages. Michael Kardos focuses on technique and presents fiction writing as a teachable (and learnable) art. With an organization built on methods and

process rather than traditional literary elements, Kardos helps students begin their stories, write strong scenes, use images and detail, revise for aesthetics and mechanics, and finish and polish their own stories. He delivers clear instruction, effective examples, and assignments that build toward finished work in a tone reviewers praise as "pitch perfect." A brief fiction anthology at the back of the book — of 15 works that Kardos draws on in his instruction — provides stories that students will love to be inspired by. Celebrate with Israel! Discover the stories of an ancient nation and a beloved land by making traditional foods and crafts. You'll eat delicious potato latkes and sweet hamantaschen cookies. Internationally renowned artist Paul Stankard provides a practical, personal guide outlining his philosophy based on self-directed learning. First, by referencing his own career path, he offers readers what he yearned for during his 45-year journey toward international acclaim: a practical, intimate guide showing how successful artists achieve excellence in their work. Stankard walks you through a selection of 150+ top works from these artists, each of whom also offers candid advice. With this guide, learn to compete with the best from the past and the present as you pursue a personal journey in the studio, or consider a career in the arts. This book promotes self-directed learning, and is destined to be a classic. Award-winning novelist Ursula K. Le Guin has turned a successful workshop into a self-guided voyage of discovery for a writer working alone, a writing group or a class.
