Skills for Academic and Career Success focuses on the essential skills you need to be successful in your studies and in your future career. This original textbook aims to improve and enhance your study skills; it also

introduces some important aspects of business and professional communication. An integrated approach is used to bring together these key fields of academic skills and business communication competency. The emphasis throughout the book is on practical, applied learning. This small pocket book contains all the essentials that every resident needs to know from day one on the wards. It presents practical, must-have information from the front lines of the wards in an easy-to-use quick reference format. Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves. A practical guide for graduating anthropology students on how to present their anthropological knowledge, skills, and abilities to employers to begin a career. ItOs All Who You Know When Working the System HereOs How to Get to Know the Right People The worldOs attention turned to the U.S. Capitol on January 20, 2009, when Barack Obama took the Presidential oath of office. But inside the building, changes had already taken place that would have broad implications for his agenda. The 111th Congress had convened on January 6 with a far stronger Democratic majority than the one that had preceded it. Their ambitious legislative agenda requires the assistance of their staffs to prepare them for all the important issues on the legislative table. Thus, it is more important than ever to know about senior congressional committee

staff members and the role they play in shaping today's legislation. While members of the House of Representatives and the Senate enact laws, it is often their staffers who exert the greatest influence in the lawmaking process. Staffers advise their elected bosses, establish political positions on issues, craft legislation, put policies in place, and play important roles on scores of congressional committees. The next time you need to find out who is the most effective person to advocate your cause, turn to the Insider's Guide for all the answers. Overall it provides access to an important, if not very visible, component of the legislative process.

Developing skills and competency in CBT is a complex process of which self-observation and self-reflection are an essential part. In this new book, leading figures Beverly Haarhoff and Richard Thwaites outline the rationale for a focus on self-reflective practice in CBT, before offering practical and accessible guidelines demonstrating how this can be achieved in training and practice. Highlighting relevant research throughout and using case studies to illustrate theory in practice, ten chapters consider: - reflection in training and in supervision and self-supervision, - reflecting on the therapeutic relationship, on our sociocultural perceptions and biases and on client feedback - how reflection is vital to self-care and to becoming a better therapist, supervisor and trainer. This is an essential read for trainees in both high and low intensity CBT programmes, those on broader CBT courses, and for qualified practitioners working independently to enhance their self-reflective capacity.
