Wild and Scenic Rivers of America Nov 25 2020 A new vision is sweeping through ecological science: The dense web of dependencies that makes up an ecosystem has gained an added dimension-the dimension of time. Every field, forest, and park is full of living organisms adapted for relationships with creatures that are now extinct. In a vivid narrative, Connie Barlow shows how the idea of "missing partners" in nature evolved from isolated, curious examples into an idea that is transforming how ecologists understand the entire flora and fauna of the Americas. This fascinating book will enrich and deepen the experience of anyone who enjoys a stroll through the woods or even down an urban sidewalk. But this knowledge has a dark side too: Barlow's "ghost stories" teach us that the ripples of biodiversity loss around us now are just the leading edge of what may well become perilous cascades of extinction.

Community Guide to Planning & Managing a Scenic Byway Dec 27 2020

There are a number of programs at local, regional, state, and federal levels to identify scenic byways. If a community regards a roadway as a special resource, there are good reasons to work toward some kind of official designation. Doing so allows the community to protect and promote its unique qualities. An important part of that process is to create a plan to balance factors like development, conservation, tourism, and economic uses of the land along the byway. This guidebook is designed to help a community to successfully maneuver through the steps of that process. There are six intrinsic criteria for scenic byway designation.
