Regional Economic Outlook, April 2015: Western Hemisphere Department Jun 20 2020 The economic outlook for Latin America and the Caribbean remains very challenging. Regional growth is projected to decline for a fifth consecutive year in 2015, dipping below 1 percent. Weakness is concentrated among South America's commodity exporters, where falling global commodity prices have compounded country-specific challenges. Meanwhile, growth is projected to be steady or stronger for most of the Caribbean, Central America, and Mexico, supported by lower oil bills for importers and robust economic recovery in the United States. The analysis in this report examines core challenges facing the region: the impact of lower commodity prices on fiscal and external positions, the drivers of the slowdown in investment, and the role of economic diversification for longer-term growth prospects.

**Managing Microaggressions** Apr 18 2020 Microaggressions have been identified as a common and troubling cause of low retention and poor psychotherapy outcomes for people of color. All therapists want and intend to be helpful to their clients, but many unknowingly committing microaggressions due to unconscious biases and misconceptions about people from ethnic and racial minority groups. **Managing Microaggressions** is intended for mental health clinicians who want to be more effective in their use of

evidence-based practices with people of color. Many well-intentioned clinicians lack the necessary skills and knowledge to effectively engage those who are ethnoracially different. This book discusses the theoretical basis of the problem (microaggressions), the cognitive-behavioral mechanisms by which the problem is maintained, and how to remedy the problem using CBT principles, with a focus on the role of the therapist. Not only will readers learn how to avoid offending or harming their clients, they will also be better equipped to help clients navigate microaggressions they encounter in their daily lives. *Managing Microaggressions* will endow clinicians with a clear understanding of these behaviors and the errors that underpin them, leading to more successful therapy.

Controlling Capital Sep 04 2021 Controlling Capital examines three pressing issues in financial market

regulation: the contested status of public regulation, the emergence of ‘culture’ as a proposed modality of market governance, and the renewed ascendancy of private regulation. In the years immediately following the outbreak of crisis in financial markets, public regulation seemed almost to be attaining a position of command – the robustness and durability of which is explored here in respect of market conduct, European Union capital markets union, and US and EU competition policies. Subsequently there has been a softening of command and a return to public-private co-regulation, positioned within a narrative on culture. The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational aspects, stakeholder connivance and wider political embeddedness. Lastly the book looks from both appreciative and critical perspectives at private regulation, through financial market associations, arbitration of disputes and, most controversially, market ‘policing’ by hedge funds. Bringing together a distinguished group of international experts, this book will be a key text for all those concerned with issues arising at the intersection of financial markets, law, culture and governance.

*Shareholders’ Duties* Nov 06 2021 It is often assumed that shareholders have rights, not duties. In recent years, however, this assumption has come under intense scrutiny in all aspects of company law and capital market law -legislation, the courts, soft law, and scholarship - and, in Europe especially, major changes are under way across a diverse spectrum all the way from revised contractual arrangements to mandatory statutory provisions. Such a shift has important implications for the fundamentals of European company law, and there is a need to examine shareholders' duties and to consider where this trend is taking shareholders and their stance in law. This focused collection of essays by twenty notable scholars addresses this complex subject from a highly informative and useful variety of perspectives. Examining shareholders' duties along three axes - types of investee companies, types of shareholders, and types of business situations - the essays deal with such topics and issues as the following: - shareholders' duties as reflections of the interests they are intended to safeguard; - shareholders' duties to society; - shareholders' disclosure obligations; - duties of

parent companies; - institutional investor's fiduciary duty; - how regulatory duties constrain value-reducing forms of opportunism; - the state's continuing duties in the transformation of state-owned companies; - significant shareholders' duties in transactions with the company; and - powerful shareholders' duty not to abuse right. Examining the implications of this shift in discourse - how shareholders' duties are coming to the fore under the impetus of legislation, legal doctrine, case law, and enforcement strategies - as well as its ideological underpinnings, this book offers a comprehensive and in-depth consideration of this rapidly developing field. It will prove of inestimable value not only to policymakers and academics, but also to investors and practitioners committed to creating conditions favourable to sustainable economic growth and responsible business behaviour.

*Turkish Migration 2016 Selected Papers* Jan 08 2022 Turkish Migration 2016 - Selected Papers - Compiled by Deniz Eroglu, Jeffrey H. Cohen, Ibrahim Sirkeci offers a selection of papers presented at the Migration Conference 2016 held in Vienna, Austria. The pieces collected here are just a sample of the work that was presented at the 2016 Turkish Migration conference. Our meeting, the 4th symposium on Turkish migration, brought together scholars from around the globe to share their research and debate mobility. As in our earlier symposia, we explored demography, sociology, culture and art as they are related to mobility. New this year was an increasing awareness of the "return" of Turks to Turkey from Germany, the challenges faced by Syrian refugees who have settled in Turkey or are passing through the country on their way to Europe as well as issues facing Kurdish minorities, Roma and other minority groups living in or transiting through Turkey.

This collection is challenged by two competing poles. One pole is centered in xenophobic nationalism. Around this pole, migrants and refugees are described as criminals, religious fanatics and “moochers” who challenge the working class and the freedoms that come with life in the West. The second pole laments the insecurity that migrants and refugees face. Around this pole, movers are described as victims who lack so much at home. In this example, migrants and refugees are moving because there are no jobs and few prospects for work; civil liberties are proscribed and banned in the face of state imposed limits and there are no opportunities to strike out on a unique path to the future. Complicating both poles is the 24-hour news cycle that denies us the opportunity to understand and analyze. Instead, we are forced to pick one pole or the other. In either case, the outcome dehumanizes the mover, signals their pathos and emphasizes why they are different.

*The School-to-Prison Pipeline* Jan 16 2020 The only text to fully address the causes, impact, and solutions to the school-to-prison pipeline The expanded use of zero tolerance policies and security measures in schools has exponentially increased arrests and referrals to the juvenile courtsóoften for typical adolescent developmental behaviors and low-level misdemeanors. This is the first truly comprehensive assessment of the ìschool-to-prison pipelineîóa term that refers to the increased risk for certain individuals, disproportionately from minority and impoverished communities, to end up ensnared in the criminal justice system because of excessively punitive disciplinary policies in schools. Written by one of the foremost experts on this topic, the book examines school disciplinary policies and juvenile justice policies that contribute to the pipeline, describes its impact on targetedóboth intentionally and unintentionallyóchildren and adolescents, and recommends a more supportive and rehabilitative model that challenges the criminalization of education and punitive juvenile justice. The book outlines effective policies, interventions, and preventative efforts that can be used to improve school climates and safety. The author includes specific recommendations for delinquency, detention, and incarceration prevention. The text incorporates a vast store of empirical knowledge from all relevant fields of study and includes research citations for more in-depth study. Case examples illuminate the plight of adolescents enmeshed in these systems along with effective interventions. The book is a vital resource for undergraduate and graduate students of social work and criminal justice as well as for juvenile court and school personnel and policymakers. Key Features: Provides a comprehensive assessment of the school-to-prison pipeline Recommends a supportive and rehabilitative

model that decriminalizes education and challenges punitive juvenile justice Written by one of the foremost national experts on this topic Identifies the major risk factors for involvement in the pipeline About the Author: Christopher A. Mallett, JD, PhD, MSW, is Professor and BSW Program Director, School of Social Work, Cleveland State University. He is licensed in Ohio as an attorney and independent social worker. His research focuses on children and adolescents with disabilities and their involvement with the mental health system, school districts (special education), child welfare, and juvenile courts, with a focus on the impact of comorbid problems and juvenile justice system outcomes. Dr. Mallett is a consultant whose expertise is nationally tapped by juvenile courts, school districts, and children's service agencies, including serving on the Schools to Juvenile Justice Technical Assistance Training Team (2013 to present) sponsored by the National Council of Juvenile and Family Court Judges (NCJFCJ). He has published over 55 journal papers, national training briefs, and book chapters, as well as a textbook, *Linking Disorders to Delinquency: Treating High Risk Youth in the Juvenile Justice System* (2013).

*Students of Color and the Achievement Gap* Dec 07 2021 *Students of Color and the Achievement Gap* is a comprehensive, landmark analysis of an incontrovertible racialized reality in U.S. K-12 public education--- the relentless achievement gap between low-socioeconomic students of color and their economically advantaged White counterparts. Award winning author and scholar Richard Valencia provides an authoritative and systemic treatment of the achievement gap, focusing on Black and Latino/Latina students. He examines the societal and educational factors that help to create and maintain the achievement gap by drawing from critical race theory, an asset-based perspective and a systemic inequality approach. By showing how racialized opportunity structures in society and schools ultimately result in racialized patterns of academic achievement in schools, Valencia shows how the various indicators of the achievement gap are actually symptoms of the societal and school quality gaps. Following each of these concerns, Valencia provides a number of reform suggestions that can lead to systemic transformations of K-12 education.

Students of Color and the Achievement Gap makes a persuasive and well documented case that school success for students of color, and the empowerment of their parents, can only be fully understood and realized when contextualized within broader political, economic, and cultural frameworks.

**Interrupting Class Inequality in Higher Education** Jan 28 2021 Interrupting Class Inequality in Higher Education explores why socioeconomic inequality persists in higher education despite widespread knowledge of the problem. Through a critical analysis of the current leadership practices and policy narratives that perpetuate socioeconomic inequality, this book outlines the trends that negatively impact low- and middle-income students and offers effective tools for creating a more equitable future for higher education. By taking a solution-focused approach, this book will help higher education students, leaders, and policy makers move from despair and inertia to hope and action.

**Governing Sourcing Relationships. A Collection of Studies at the Country, Sector and Firm Level** Aug 23 2020 This book contains 11 papers from the 8th Workshop on Global Sourcing, held in Val d'Isère, France, during March 23–26, 2014, which were carefully reviewed and selected from 42 submissions. They are based on a vast empirical base brought together by leading researchers in information systems, strategic management, and operations. This volume is intended for students, academics, and practitioners interested in research results and experiences in outsourcing and offshoring of information technology and business processes. Topics discussed in this book combine theoretical and practical insights regarding challenges that industry leaders, policy makers, and professionals face; and they predominantly focus on how sourcing relationships are governed at the national, industry, and firm level. The contributions also examine current

and future trends in outsourcing, paying particular attention to cloud services and their impact on the outsourcing sector.

**School Memories** Oct 13 2019 This book reveals how school memories offer not only a tool for accessing the school of the past, but also a key to understanding what people today know (or think they know) about the school of the past. It describes, in fact, how historians' work does not purely and simply consist in exploring school as it really was, but also in the complex process of defining the memory of school as one developed and revisited over time at both the individual and collective level. Further, it investigates the extent to which what people "know" reflects the reality or is in fact a product of stereotypes that are deeply rooted in common perceptions and thus exceedingly difficult to do away with. The book includes fifteen peer-reviewed contributions that were presented and discussed during the International Symposium "School Memories. New Trends in Historical Research into Education: Heuristic Perspectives and Methodological Issues" (Seville, 22-23 September, 2015).

**The Economic and Fiscal Consequences of Immigration** Sep 23 2020 The Economic and Fiscal Consequences of Immigration finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for

prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and health care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. The Economic and Fiscal Consequences of Immigration assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community.
