Data Mining: Concepts and Techniques May 04 2021 Data Mining: Concepts and Techniques provides the concepts and techniques in processing gathered data or information, which will be used in various applications. Specifically, it explains data mining and the tools used in discovering knowledge from the collected data. This book is referred as the knowledge discovery from data (KDD). It focuses on the feasibility, usefulness, effectiveness, and scalability of techniques of large data sets. After describing data mining, this edition explains the methods of knowing, preprocessing, processing, and warehousing data. It then presents information about data warehouses, online analytical processing (OLAP), and data cube technology. Then, the methods involved in mining frequent patterns, associations, and correlations for large data sets are described. The book details the methods for data classification and introduces the concepts and methods for data clustering. The remaining chapters discuss the outlier detection and the trends, applications, and research frontiers in data mining. This book is intended for Computer Science students, application developers, business professionals, and researchers who seek information on data mining. Presents dozens of algorithms and implementation examples, all in pseudo-code and suitable for use in real-world, large-scale data mining projects Addresses advanced topics such as mining object-relational databases, spatial databases, multimedia databases, time-series databases, text databases, the World Wide Web, and applications in several fields Provides a comprehensive, practical look at the concepts and techniques you need to get the most out of your data

Fundamentals of Plant Physiology, 20th Edition Feb 25 2023 This new edition of Fundamentals of Plant Physiology continues to provide a comprehensive coverage on the basic principles of the subject with its focus on the concepts of plant physiological form, functions and its behaviour. While this new edition includes several contemporary topics to keep students abreast with the new ongoing research in the field, it also includes 11 new experiments to further strengthen the scientific outlook of the reader. Besides fulfilling the needs of undergraduate students, this book would also be useful for postgraduate students as well as aspirants of various competitive examinations.

Manual of Structural Kinesiology Sep 20 2022 "A very careful review of the entire text including all figures and tables has been conducted with the intent of simplifying and clarifying for better understanding when possible. Additional terms, content and concepts in select cases have been

added. These include body positions, open vs. close packed joint positions, concave-convex rule, Lombard's paradox, and a lever terminology table. Chapters 4 through 11 now have a table detailing how to locate and palpate the key bony and joint landmarks. The labeling and captions in many figures have been enhanced with further details. Terms for the "peroneal" muscles and nerves have been changed to more current international term fibular or fibularis. In many cases fibularis is directly followed by peroneal in parenthesis to avoid confusion. Further details on the plantaris muscle have also been added. Additional references have been added along with some revisions and additions to the review and laboratory exercises, and end-of-chapter worksheets. Additional questions and exercises will continue to be added to the Online Learning Center. Finally, a few new terms have been added to the Glossary"--

War and Peace in the 20th Century and Beyond Sep 08 2021 At the turn of the 21st Century, the world was immediately gripped by the War on Terrorism followed by the Iraq War. In reflection, the 20th Century was a period marked by tremendous technological and economic progress — but it was also the most violent century in human history. It witnessed two horrendous world wars, as well as the conflicts during the Cold War. Why do wars persistently erupt among nations, particularly the Great Powers? What are the primary factors that drive nations to violence — power, prestige, ideology or territory? Or is it motivated by pure fear and mistrust? Peering nervously at the 21st Century, we wonder whether American supremacy and globalization will help ensure peace and stability. Or will shifts in power with the emergence of new economic super-nations lead to further tensions and conflicts in this century? Together with 29 Peace Nobel laureates, an outstanding group of scholars gathered in Oslo, Norway, on December 6, 2001, for the three-day Nobel Centennial Symposium to discuss "The Conflicts of the 20th Century and the Solutions for the 21st Century". Read this book for the scholars' candid insights and analyses, as well as their thought-provoking views on the factors that led to conflicts in the 20th Century and whether the 21st Century will be a more peaceful one. This is a rare — and possibly the best and only — book compilation of the highly intellectual analyses by world experts and Nobel Peace laureates on the perennial issues of War & Peace. Contents: Introduction: The Conflicts of the 20th Century and the Solutions for the 21st Century, Geir Lundestad & Olav Njølstad, The Norwegian Nobel Institute Dialogue and Cooperation to Achieve World Peace, Dae-Jung Kim, ex-President, The Republic of Korea War and Peace in the 20th Century, Eric Hobsbawm, Birkbeck College, University of London Ideologies and Politics: Liberal Democracy and National Dictatorship in Peace and, War Michael W Doyle, Princeton University Making Sense of Political Violence in Postcolonial Africa, Mahmood Mamdani, Columbia University Global Inequality and Persistent Conflicts, Amartya Sen, University of Cambridge (UK), and the 1998 Nobel Prize winner in Economic Sciences The Rise and Fall of Great Powers, Joseph S Nye, Harvard University Beyond Militarism, Arms Races and Arms Control, Mary H Kaldor, London School of Economics Rivalry over Territory and Resources and the Balance of Peace and War: The 20th Century, Louise Fawcett, St Catherine's College, Oxford University Misperception, Mistrust, Fear, Akira Iriye, Harvard University The Nobel Peace Prize in Its Next Century: Old and New Dimensions, Geir Lundestad, The Norwegian Nobel Institute Readership: Students, researchers, academics, politicians, journalists, and anyone interested in 20th century history and peace and conflict studies. Keywords: War; Peace; 20th Century; Conflicts and Solutions Nobel Symposium Reviews: "This beautifully produced and edited volume presents a fascinating collection of essays structured around the objectives engendered by the awarding of the Nobel Peace Prize ... this ensemble of contributions provides an excellent insight into the evolution of thinking about war and peace. As a reflection upon these crucial issues, it is readable, informative and highly recommended." Journal of Peace Research

Nutritional Care of Preterm Infants Aug 27 2020 Improved conditions of care for premature infants have led to markedly increased survival rates over the last few decades, particularly in very low and extremely low birth weight infants. Nutritional measures play a central role in the long-term outcome, health, and quality of life of these premature infants. In this updated and extended edition, leading experts from all over the world present the most recent evidence and critical analyses of nutrient requirements and the practice of nutritional care (with the focus on very low birth weight infants) to provide guidance for clinical application. The chapters of this publication show how growth and development can be nutritionally supported, which nutrients and non-nutrients can be supplied, and how nutritional care can get implemented. Approaches to nutritional care in various disease conditions are also addressed. The compilation of current information and recommendations should support the daily work of health care professionals such as neonatologists, paediatricians, other physicians involved in the care of preterm infants, nurses, nutritionists/dieticians, and others. The current book is also of interest for researchers who wish to keep up to date in this moving field.

Brief Coaching for Lasting Solutions Oct 29 2020 Like so many helping professionals today, coaches are discovering that the most effective treatment plan is not always the one that takes the most time. Perhaps more so than in any other situation, coaching allows practitioners to quickly forge collaborative relationships with their clients and help them maximize their performance in work and in life. *Brief Coaching for Lasting Solutions* teaches coaches how to conduct conversations that are most useful to clients in achieving their goals within a brief period of time. The authors, two of the leading practitioners of the brief coaching method, masterfully guide readers through the steps of this process—from the initial meeting to follow-up sessions to troubleshooting setbacks—while illustrating essential skills with ample case examples. This book is written for coaches who want to reduce the time it takes to provide effective coaching while making the best use possible of resources the client brings to the table. At the same time it is written for the benefit of today's clients, so many of whom want to avoid coaching that is time-intensive and costly, and instead seek coaching that is organized, efficient, and affordable. Whether your clients seek a solution to a specific problem or strive toward a more general life goal, this invaluable resource will put you on the path to brief coaching success.

Now, Discover Your Strengths Apr 15 2022 The 20th anniversary edition of *Now, Discover Your Strengths* comes with an access code to the Clifton StrengthsFinder 2.0 assessment. This updated assessment includes reports and resources that go far beyond the standardized reports of the older assessment by providing you with personalized insight statements unique to your specific combination of strengths. The original publication of *Now, Discover Your Strengths* in 2001 launched a worldwide strengths revolution. To date, more than 20 million people have discovered their strengths, and tens of thousands more are discovering theirs every week. Gallup Press has published numerous strengths-based books, and Gallup Strengths Center has become a worldwide destination for strengths-based development. Since the book's release, Gallup has continued to dedicate countless hours to developing our strengths science, the brainchild of the late Dr. Donald O. Clifton, who was named Father of Strengths-Based Psychology by the American Psychological Association. Part of that investment resulted in Clifton StrengthsFinder 2.0 -- a refined upgrade of the original assessment for discovering your strengths. To ensure that you have the best possible experience in discovering and developing your strengths, we have made Clifton StrengthsFinder 2.0 available to those who purchase the 20th anniversary edition of *Now, Discover Your Strengths*. The updated assessment includes new reports and resources, including the Strengths Insight and Action-Planning Guide. This guide goes far beyond the standardized reports of the older assessment by providing you with personalized insight statements unique to your specific combination of strengths. These highly customized Strengths Insights are an in-depth analysis of your top five strengths. They describe who you are in astonishing detail and provide you with a comprehensive understanding of yourself, your strengths and what makes you stand out. These updated resources, in combination with the 20th anniversary edition of *Now, Discover Your Strengths*, give you the best opportunity to soar with your strengths -- at work and in your life.

Degradation of MTBE and TBA in Aqueous Solution by Ozone/UV Process Jun 24 2020 Methyl tert-butyl ether (MTBE) is currently the leading contaminant of groundwater in the United States. The widespread presence of MTBE along with its degradation by-product, tert-butyl alcohol (TBA), in groundwater has created great concern in the scientific community because MTBE and TBA are suspected as possible human carcinogens. In this research, the degradation of MTBE and TBA in aqueous solution by O₃/UV process has been investigated. Laboratory studies were conducted using a semi-batch reactor under various experimental conditions, i.e., incident UV light intensity, influent ozone gas concentration, and water quality in terms of varying bicarbonate concentration. Furthermore, the O₃/UV process was modeled by using oxalic acid as a probe chemical. Oxalic acid was oxidized by O₃/UV process under various experimental conditions; and the model successfully predicted the residual concentration of oxalic acid. In order to understand the degradation mechanisms of MTBE and TBA, a comprehensive kinetic model that describes the degradations of MTBE, TBA and their intermediates by O₃/UV process was proposed. The model was calibrated using experimental data on MTBE and TBA spiked in synthetic solution. An attempt was made to verify the kinetic model using different sets of experimental data. The model predicted well the removal of MTBE and TBA; however, the accumulation and decay of some primarily intermediates were predicted with slight variations. Finally, real groundwater samples contaminated with MTBE and TBA were oxidized by O₃/UV process under various experimental conditions. It was observed that the removal rate of MTBE and TBA was reduced by the presence of other gasoline components, such as BTEX. Furthermore, for groundwater sample without iron the kinetic model predicted the degradation of MTBE as well as accumulation and decay of reaction intermediates with slight variations. In conclusion, this research provides valuable information on the degradation mechanisms of MTBE, TBA, and their intermediates. The O₃/UV process was very successful in degrading MTBE and TBA in aqueous solution. Moreover, it was observed that the reaction intermediates react well in the O₃/UV process, and complete mineralization could be achieved, if desired.

Semigroups of Bounded Operators and Second-Order Elliptic and Parabolic Partial Differential Equations Dec 11 2021 Semigroups of

Bounded Operators and Second-Order Elliptic and Parabolic Partial Differential Equations aims to propose a unified approach to elliptic and parabolic equations with bounded and smooth coefficients. The book will highlight the connections between these equations and the theory of semigroups of operators, while demonstrating how the theory of semigroups represents a powerful tool to analyze general parabolic equations. Features Useful for students and researchers as an introduction to the field of partial differential equations of elliptic and parabolic types Introduces the reader to the theory of operator semigroups as a tool for the analysis of partial differential equations

Final Solutions Jul 26 2020 Benjamin A. Valentino finds that ethnic hatreds or discrimination, undemocratic systems of government, and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed. He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society. Mass killing, in his view, is a brutal political or military strategy designed to accomplish leaders' most important objectives, counter threats to their power, and solve their most difficult problems. In order to capture the full scope of mass killing during the twentieth century, Valentino does not limit his analysis to violence directed against ethnic groups, or to the attempt to destroy victim groups as such, as do most previous studies of genocide. Rather, he defines mass killing broadly as the intentional killing of a massive number of noncombatants, using the criteria of 50,000 or more deaths within five years as a quantitative standard. Final Solutions focuses on three types of mass killing: communist mass killings like the ones carried out in the Soviet Union, China, and Cambodia; ethnic genocides as in Armenia, Nazi Germany, and Rwanda; and "counter-guerrilla" campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan. Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing.
