Advanced Problems in Mathematics: Preparing for University 11 2021 This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.

Jennifer Garza-Cuen and Odette England: Past Paper // Present Mocks 3 Feb 13

2022 In 2018, Jennifer Garza-Cuen and Odette England spent a week at the

Robert Rauschenberg Foundation Residency in Captiva, Florida, collaborating on a series of nearly 200 photograms. The images were made in Rauschenberg's swimming pool, using expired 1970s gelatin silver paper found in his darkroom. The two artists "activated" the paper by piercing or slashing the bags and envelopes using pens, scissors, or knives; folding the silver paper at odd angles; or layering them inside the bags. Some sank to the bottom of the pool, while others floated on top or by the filtration units. Exposures were made overnight and throughout the day, allowing different levels and intensities of sunlight, moonlight, and water to penetrate the paper.
