HAm Radio collecting and history. This new reference work addresses both the maintenance and the upkeep of existing movable bridges, as well as the complete design of new movable bridges. Comprehensive coverage is provided on engineering design and actual construction technology used in building all major types of bridges, including all structural issues and relevant mechanical and electrical systems used to make such bridges functional. Includes coverage of vertical lift, swing, and bascule bridges for both highway and railway usage Offers valuable guidance on operation, maintenance, inspection, and rehabilitation of moveable bridges Listeners will find unsurpassed professional, comprehensive data on public safety and business radio communications. This handbook contains a wealth of information, including instructions for building a variety of antennas. The Truth Table lists the actual dB gain of 10 popular antennas. "The Palouse

region of Eastern Washington and North Idaho produces the highest yields of any wheat-growing district in North America, followed closely by farmlands in the adjoining Walla Walla and Camas Prairie regions. Early farmers clamored for railroads to carry their harvests to world markets, and soon a veritable spider's web of competing rail routes left few corners of the Inland Northwest untouched. Some lines also reached into nearby forests to haul timber to local sawmills and ship out finished lumber. As the principal transporter of people and goods prior to World War II, railroads served an integral role in the communities they served. Despite traffic losses to competing trucks and river barges, railroads still haul considerable grain and wood products tonnage on these lines today. Palouse Rails tells the stories of seven major railroads serving these regions, from their origins to the present day, through the eyes of contemporary railroad photographers. These images capture the railroad equipment, locations, personnel, and operations that, for generations, have connected Inland Northwest's agricultural regions with each other and with the world."

Life and work of Dieter Rams, with discussion and catalogue of his work for the Braun electrical company. Nearly two hundred photographs, drawings, documents, and a diary kept during its inaugural tour are included in this history of the concept train that became a postwar symbol of American know-how and promised a bright future for railroads.

Dawn is a normal suburban high school senior living Saratoga Springs, New York. Her father is an expert in legends and myths and is a professor at the nearby college. She is a good looking popular girl with a boring mundane life until a new girl moves into the neighborhood. Grace is shy and looks like she stepped out of the 1940's and makes quite an impression with the kids at school. Dawn decides early on to befriend her even though she will lose her social status and takes a seat at the Nerd Table. Grace tends to be strange and keeps to herself except when around Dawn and with Dawn's help Grace blossoms. After Brandon, the captain of the football team asks Dawn out her life becomes a roller coaster of emotions and things become even more twisted after Grace's brother Max arrives

and the two foster a relationship that thrusts her into a dark world where nothing is as it seems. Focusing on hardware and software set-up issues, this invaluable source offers practical guidelines on converting video movies into a digital format that can be stored, edited and played back on a Macintosh or PC. Explains how to select the best hardware and software within your budget, integrate high-quality audio and special effects and output PC-produced videos to videotape. Includes CD-ROM with Macintosh and Windows digital video clips. Presents Islamic stories that offer a background in Islamic traditions, folk tales, and mystical verse. Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.
