Spatial Characteristics of Eastern White Pine and Red Pine Forests in Ontario Jul 08 2021 This study quantified the landscape characteristics of eastern white pine and red pine forests in Ontario using a combination of LANDSAT TM imagery and aerial photographs to develop a spatial data base of 275,000 sq km. Analyses on spatial distribution, representativeness, configuration, and fragmentation were conducted in a GIS environment. Results are presented by pine type by both Hills' ecological hierarchy and the administrative hierarchy of the Ontario Ministry of Natural Resources.

Eloisa Nov 12 2021 This is a reproduction of the original artefact. Generally these books are created from careful scans of the original. This allows us to preserve the book accurately and present it in the way the author intended. Since the original versions are generally quite old, there may occasionally be certain imperfections within these reproductions. We're happy to make these classics available again for future generations to enjoy!

The Cache-coherence Problem in Shared-memory Multiprocessors Jan 22 2020 A tutorial on the nature of the cache coherence problem and the wide variety of proposed hardware solutions currently available. A number of the most important papers in this field are included within seven sections: introductory issues; memory reference characteristics of parallel programs; directo

Originals May 18 2022 The #1 New York Times bestseller that examines how people can champion new ideas in their careers and everyday life—and how leaders can fight groupthink, from the author of *Think Again* and co-author of *Option B* “Filled with fresh insights on a broad array of topics that are important to our personal and professional lives.”—The New York Times DealBook “Originals is one of the most important and captivating books I have ever read, full of surprising and powerful ideas. It will not only change the way you see the world; it might just change the way you live your life. And it could very well inspire you to change your world.” —Sheryl Sandberg, COO of Facebook and author of *Lean In With Give and Take*, Adam Grant not only introduced a landmark new paradigm for success but also established himself as one of his generation’s most compelling and provocative thought leaders. In *Originals* he again addresses the challenge of improving the world, but now from the perspective of becoming original: choosing to champion novel ideas and values that go against the grain, battle conformity, and buck outdated traditions. How can we originate new ideas, policies, and practices without risking it all? Using surprising studies and stories spanning business, politics, sports, and entertainment, Grant explores how to recognize a good idea, speak up without getting silenced, build a coalition of allies, choose the right time to act, and manage fear and doubt; how parents and teachers can nurture originality in children; and how leaders can build cultures that welcome dissent. Learn from an entrepreneur who pitches his start-ups by highlighting the reasons not to invest, a woman at Apple who challenged Steve Jobs from three levels below, an analyst who overturned the rule of secrecy at the CIA, a billionaire financial wizard who fires employees for failing to criticize him, and a TV executive who didn’t even work in comedy but saved *Seinfeld* from the cutting-room floor. The payoff is a set of groundbreaking insights about rejecting conformity and improving the status quo.

Genetics of Original Sin Mar 16 2022 Increasingly absorbed in recent years by advances in our understanding of the origin of life, evolutionary history, and the advent of human kind, eminent biologist Christian de Duve has pondered the future of life on this planet. Focusing on the process of natural selection, de Duve explores the inordinate and now dangerous rise of humankind.--[book jacket]

"Original Sin"? Jun 19 2022 “Revisionist” or “alternative” historians have increasingly questioned elements of the Singapore Story — the master narrative of the nation’s political and socioeconomic development since its founding by the British in 1819. Much criticism focuses especially on one defining episode of the Story: the internal security dragnet mounted on 2 February 1963 against Communist United Front elements on the island, known to posterity as

Operation Coldstore. The revisionists claim that Coldstore was mounted for political rather than security reasons and actually destroyed a legitimate Progressive Left opposition — personalized by the charismatic figure of Lim Chin Siong — rather than a dangerous Communist network as the conventional wisdom holds. Relying on both declassified and some previously unseen classified sources, this book challenges revisionist claims, reiterating the historic importance of Coldstore in helping pave the way for Singapore's remarkable journey from Third World status to First in a single generation.
