Nathanael Vette proposes that the Gospel of Mark, like other narrative works in the Second Temple period, uses the Jewish scriptures as a model to compose episodes and tell a new story. Vette compares Mark's use of scripture with roughly contemporary works like Pseudo-Philo, the Genesis Apocryphon, 1 Maccabees, Judith, and*

*the Testament of Abraham; diverse texts which, combined, support the existence of shared compositional techniques. This volume identifies five scripturalized narratives in the Gospel: Jesus' forty-day sojourn in the wilderness and call of the disciples; the feeding of the multitudes; the execution of John the Baptist; and the Crucifixion of Jesus. This fresh understanding of how the Jewish scriptures were used to compose new narratives across diverse genres in the Second Temple period holds important lessons for how scholars read the Gospel of Mark. Instead of treating scriptural allusions and echoes as keys which unlock the hidden meaning of the Gospel, Vette argues that Mark often uses the Jewish scriptures simply for their ability to tell a story.*

*In 2005, almost 700,000 immigrants acquired the citizenship of a member state of the European Union; over 600,000 became US citizens; nearly 100,000 became Australians and approximately 200,000 Canadians. 2005 was not an exceptional year. During the past decades, many advanced liberal democracies have become more ethnically diverse societies. This book breaks new ground in the analysis of the political representation of immigrants and visible minorities both theoretically and empirically. It examines the upward trend in migrant and minority representation and demonstrates that there remain crucial differences across liberal democracies in the timing of these developments; in channels of access for minority representatives, in the policy focus and outcomes of minority representation; in the nature of the connections between minority representatives and minority communities, and in the nature of their relationships with constituents at large. Part I analyses immigrants and visible minorities as voters, who must be the starting point of any analysis of political representation. Part II deals with the stage of candidate selection within political parties, a crucial and under-researched stage in the process of political representation. Part III deals with immigrants and members of visible minorities, once elected to parliament and includes analyses of the Canadian Parliament, the German Bundestag, MPs in the United Kingdom and Members of the United States Congress. The book will of interest to students and scholars of migration and ethnicity studies and political science, especially those with an interest in political representation, democratic institutions, voting behaviour, party organisation, legislative behaviour and comparative politics.*

*IP Telephony Using CallManager Express Lab Portfolio provides a hands-on approach to learning the basic principles of voice over IP (VoIP) to build a voice-enabled network for the small to medium-sized business. As you work through the 51 labs in the book, you learn how to deploy a basic phone system using a CallManager Express-capable router. This is a literary and theological study of the Biblical Antiquities of Pseudo-Philo--a long, well-written reinterpretation of the Hebrew Bible written by a Palestinian Jew of the first century C.E. Using the methodologies of redaction and literary criticism, Murphy provides an analysis of the whole of the Biblical Antiquities. After a chapter-by-chapter analysis, Murphy addresses several topics more generally--major characters, major themes, and the historical context of the work. Full concordances to the Latin text are provided to assist future research on Pseudo-Philo. This book will prove an important resource for students of Jewish interpretation of the Bible at the end of the Second Temple period. It also sheds light on Jewish thought of the period regarding covenant, leadership in Israel, women in Israel, relations with Gentiles, divine providence, divine retribution, eschatology, and many other subjects. Furnishing a broad interpretive context for future work on the Biblical Antiquities, this study gives students of the Bible access to an important literary and religious product of first-century Judaism.

An Evolve companion website provides convenient access to animations, flash card sets, and additional review questions. Experienced author, speaker, and educator Mary L. Turgeon is well known for providing insight into the rapidly changing field of clinical laboratory science. The 1990's was designated as 'the decade of the brain' and now, common mental disorders are described as 'brain disorders'. Yet intense research interest on the brain has largely side-lined the body as a passive observer, disconnecting mental from physical health and contributing to further societal stigma on the nature of psychiatric illness and mental distress. The biopsychosocial pathway to premature mortality or longevity is a complex one, involving a host of closely intertwined mechanisms and moderating factors, some of which are investigated in this special issue. All the articles published here provide new insights into the pathways linking emotion, physical health and longevity, highlighting the tight linkage between mind, brain and body.
