**Transnational Migration and Human Security** Sep 29 2020 The volume places the migration-development-security nexus in the field of transnational studies. Rather than treating these three categories as self-evident, the essays excavate aspects of power and privilege built into their governing frameworks and conflicting rationales apparent in practices of control. Bringing together diverse experiences and case studies, the volume highlights the problematic nature of maintaining distinct and disconnected frameworks of governance. It argues for a new approach that demonstrates the significance and usefulness of comparative ethics in conceptualising migration from a human-centered and gendered perspective in order to address the multi-faceted and multi-dimensional nature and meanings of "security".

Leading Across New Borders Feb 27 2023 An insightful, real-world look at the skills today's global leadership demands **Leading Across Borders** is the leadership guide for the new business environment. The world's economic center of gravity is shifting at a rapid pace – huge emerging economies have already emerged. As businesses operate in an increasingly global context, the most successful leaders are able to see through the eyes of others and to hear the voices of customers and colleagues from around the

world. They build their own personal networks, navigate differences, and work effectively across new borders – both the physical borders between countries and the limits of old leadership paradigms. This book features direct input from people in critical roles around the world, advice based on deep practical experience, and new data that identifies the distinctive challenges of leading in an environment becoming more thoroughly interdependent every day. There is valuable advice for anyone taking on a global leadership role. You'll find strategies and tools for working across cultures, leading inclusively, running a matrix team, innovating, integrating an acquisition, and making tough ethical choices. Each chapter challenges established leadership models and shares hard-won expertise in dealing effectively with a changing reality that includes both fast-growth and slow-growth markets. You will learn how to serve more numerous stakeholders and to achieve your goals in a complex organizational structure without having direct lines of authority. This insightful guide helps you work more effectively at the self, team, and organizational levels, so you can get things done and grow your business. The increasing importance of China, India, Brazil, Indonesia, Turkey, and other developing economies has opened the world of business leadership far beyond our own borders. This book gives you a framework for coordinating it all, and being the leader your organization needs. Operate insightfully at the personal level

in order to better lead others Shape, motivate, and drive your global team to exceptional performance Navigate differences in culture, language, economics, and more Exercise your vision, influence, and expertise to lead your organization forward The trend toward global leadership has emerged full-blown amidst the rising global economy. Today's leadership must understand how to work effectively and efficiently across a variety of contexts. *Leading Across Borders* provides a roadmap to the new leadership paradigm, helping you expand your own skillset and create forward momentum.

*People Analytics* Feb 03 2021 This book is an exploration of the people analytics possibility, bringing out both theoretical frameworks and detailed practical case studies from the author's experience in industry and business across both sides of the table, with an understanding of data science models and SMAC (Social, Mobile & Cloud) technologies underpinning it. It further explores and lays out a business case for why

organizations need to invest behind this space and why HR functions and businesses need to embrace and adopt it. The book examines how people analytics makes a difference to business, describes stages of adoption and maturity models for its effective deployment in organizations and explores the journey from employee master data management and conversion to reporting and visualizations to dash-boarding and descriptive analytics, operational analytics to finally predictive modelling. The book provides insights on the impact of big data and social networks on HR and talent frameworks and the opportunity for HR to mine these networks with a view to culling out predictive insights for the business. It also describes in great detail the specific applications of people and talent analytics through case examples. The book discusses and makes the case for HR to be metric driven focused on business outcomes. It enumerates upon “lead” and “lag” indicators and the need to leverage relevant measurement systems. It provides an understanding of relevant statistical tools that could be deployed to mine key insights from the data to enable robust decision-making, and examines the power of “visual intelligence” and data representation that goes beyond traditional tools like Excel. This book is for HR practitioners who seek to challenge the status quo. It does so by helping them leverage a data and evidence based approach; asking the right questions and building new capabilities with a view towards

leading change and driving transformation both in their domain, the wider business and the larger organization. The book is also useful for HRM students to gain a deep understanding of “people analytics” as a critical sub-domain within HR. “HR is not just about people but now also about Tech, Data and Analytics. Upgrading numerical/analytics skills in order to have greater impact on the business, is the new wave of HR, which Rahul helps address via his own rich experience.” - Gurprriet Siingh, Managing Director, Russell Reynolds Associates, Mumbai, India. “This book would help HR & Leadership Teams find a way of discarding perceptions and uncovering truth by embracing data patterns as opposed to just continuing with incremental changes to how it has always been. This is particularly so of successful organizations.” - Vikas Gupta, Divisional Chief Executive Officer, Education and Stationery Products Business, ITC Limited, Gurugram, India.

INNOVATIONS AND INNOVATIVE PRACTICES IN START-UP IT COMPANIES IN PUNE Jul 28 2020 1.1 Overview of research study: The information technology industry has become one of the most significant growth catalysts for the Indian Economy. In addition to fuelling India's economy this industry is also positively influencing the lives of its people through direct and indirect contribution to the various socio-economic parameters such as employment, standard of living, education and diversity among others .Growing at an extremely high pace ,the industry has

demonstrated a decade of strong growth-growing 15 times to aggregate revenues of USD 69.4 billion in FY 2009. In addition it is one of the largest employers in the organized sector. It provides direct livelihood to 2.2 million. As far as India is concerned the IT industry had humble beginnings with a few Indian entrepreneurs setting up IT services companies and select MNCs such as GE, Texas Instruments and American Express setting up their captive centres in India. Cost arbitrage through abundant talent pool available in India was the key driver for off shoring to India. The perceived success of the first few captives led other MNCs to consider entering India to set up their back office and product development centres. India based third party players started offering similar services to capitalize on the opportunity. The Y2K phenomenon and the dot-com bust gave a strong push to outsourcing of technology services to India, especially after Indian companies were able to prove their capability in delivering the desired quality and functionality at a significantly lower cost. Over a period of time this industry has attracted the attention of PE investors leading to a large number of Indian entrepreneurs setting up IT –BPO centers. While cost considerations used to be the primary driver earlier, other factors like performance, quality, productivity have emerged as key reasons for outsourcing work to India.

Engineering Earth Oct 31 2020 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective. The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social, environmental, and engineering sciences. Together they document and illustrate with case studies, maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical, contemporary and postmodern perspectives. This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local, regional, and global scales and from disciplinary and trans-disciplinary perspectives.

**Development in India** Sep 22 2022 This book examines various facets of the development process such as aid, poverty, caste networks, corruption, and judicial activism. It explores the efficiency of and distributional issues related to agriculture, and the roles of macro models and financial markets, with a special emphasis on bubbles, liquidity traps and experimental markets. The importance of finite changes in trade and development, as well as that of information technology and issues related to

energy and ecosystems, including sustainability and vulnerability, are analyzed. The book presents papers that were commissioned for the Silver Jubilee celebrations at the Indira Gandhi Institute of Development Research (IGIDR). The individual contributions address related development problems, ensuring a homogeneous reading experience and providing a thorough synthesis and understanding of the authors' research areas. The reader will be introduced to various aspects of development thought by leading and contemporary researchers. As such, the book represents an important addition to the literature on economic thought by leading scholars, and will be of great value to graduate students and researchers in the fields of development studies, political economy and economics in general.

**Indian Multinationals in the World Economy** Jan 26 2023 Indian multinationals have been active in the world economy since early 1960s. However, their number and scale of operation have grown significantly in the last fifteen years or so. In the face of increasing global competition unleashed by extensive liberalization measures, Indian firms have adopted the strategy of outward foreign direct investment (OFDI) as an integral part of their business strategies. By undertaking greenfield OFDI and brownfield OFDI for acquiring foreign companies, Indian firms are enhancing their

potential for growth and global competitiveness. Consequently India has emerged as a major developing source country of FDI and Indian multinationals are likely to affect world development in several ways. The book analyses the phenomenon of Indian multinationals from both macro level factors and firm-level corporate strategies and examines its implications for India and host countries. A detailed investigation of Indian overseas investment flows and stocks from sectoral, regional, ownership and motivational perspectives provides a rigorous long-run coverage of Indian multinational firms from 1970s onwards. The role of innovation, entrepreneurial skills, scale of business, productivity, and the role of government policies, received critical attention in explaining the emergence of Indian multinationals. The comprehensive quantitative and case studies approach offers valuable insights into the behaviour and impacts of these new global actors on home and host countries. This book offers a number of lessons to home country, host countries, and Indian enterprises becoming multinationals. With the growing global interest from policy makers, business practitioners, researchers, and students in Indian multinationals, this book would serve as an important and timely reading for all of them.

*Criminal Resistance?* Aug 29 2020 Crude oil extraction in the Niger Delta region of Nigeria generates 96% of all foreign earnings and 85% of state revenues, making it crucial to the survival of the Nigerian state. Several generations of state neglect, corruption and mismanagement have ensured that the Delta region is one of the most socio-economically and politically deprived in the country. By the late 1990s there was a frightening proliferation of armed gangs and insurgent groups. Illegal oil bunkering, pipeline vandalism, disruption of oil production activities, riots, and demonstrations intensified and in 2003, insurgents began kidnapping oil workers at a frenetic pace. In late 2005, an uber-insurgent movement 'organization' was formed in Nigeria.

Christened the Movement for the Emancipation of the Niger Delta (MEND), it operates as an amorphous, multifaceted amalgam of insurgent groups with an unprecedented clinical precision in execution of intents. By focussing on kidnappings that are putatively connected to the struggle for emancipating the Niger Delta, Oriola makes the case for analysing MEND as a social movement organization, rather than a terrorist or criminal gang by showing how political processes shape kidnappings in the Delta. The use of violent repertoires of contention has not garnered sufficient attention in the social movement literature, despite the fact that that around the world, many similar

groups are adopting violent tactics without necessarily eschewing non-violent techniques. Based on multi-actor research, including interviews and focus group discussions with community members, military authorities, 42 ex-insurgents directly involved in illegal oil bunkering and kidnapping, and official email statements from 'Jomo Gbomo', the spokesperson of MEND, this book will be of interest to sociologists, political scientists and peace and security studies scholars.

**Introduction to Nonprofit Management** Jan 02 2021 Introduction to Nonprofit Management: Text and Cases is a unique collection of 28 cases from Ivey Publishing at the Richard Ivey School of Business. This casebook helps students gain a better understanding of nonprofit management by providing contemporary cases from around the world, illustrating the complexity of nonprofit management in a variety of different sectors. Each chapter begins with a substantive introduction to the chapter topic by the editors. The book matches cases to the key concepts in nonprofit management, allowing students to discuss the outcomes and consider the reasons for success or failure. In addition to covering topical issues for managing a nonprofit organization, the book also discusses current trends in the field such as social entrepreneurship, earned income strategies, advocacy, lobbying and leadership. The SAGE Text and Cases Series, featuring IVEY Cases, is a co-publishing partnership between SAGE and the

Richard Ivey School of Business at The University of Western Ontario. Due to their popularity in more than 60 countries, approximately 200 new cases are added to the Ivey School of Business library each year. These affordable collections not only help students connect to real-world situations, but also benefit a professional readership seeking continued education in the field.

*Seven Ways to Change the World* Nov 24 2022 THE SUNDAY TIMES TOP TEN BESTSELLER 'His vision, ideas and passion shine through on every page' Ed Balls 'Compelling, challenging, inspiring and very timely' Piers Morgan 'Immensely

powerful and persuasive...I found it exhilarating throughout' Joanna Lumley When the Covid-19 pandemic swept across the globe in 2020, it created an unprecedented impact, greater than the aftermath of 9/11 or the global financial crisis. But out of such disruption can come a new way of thinking, and in this superb new book former UK prime minister Gordon Brown offers his solutions to the challenges we face in 2021 and beyond. In the book, he states that there are seven major global problems we must address: global health; climate change and environmental damage; nuclear proliferation; global financial instability; the humanitarian crisis and global poverty; the barriers to education and opportunity; and global inequality and its biggest manifestation, global tax havens. Each one presents an immense challenge that requires an urgent global response and solution. All should be on the world's agenda today. None can be solved by one nation acting on its own, but all can be addressed if we work together as a global community. However, Brown remains optimistic that, despite the many obstacles in our way, we will find a path to regeneration via a new era of global order. Yes, there is a crisis of globalisation, but we are beginning to see the means by which it might be resolved. Crises create opportunities and having two at once shouldn't just focus the mind, it might even be seen as giving greater grounds for hope. In *Seven Ways to Change the World*, Brown provides an authoritative and

inspirational pathway to a better future that is essential reading for policy makers and concerned citizens alike.

Services Offshoring and its Impact on the Labor Market Mar 04 2021 Services – from information technology to research to finance – are now as subject to international trade as goods have been for decades. What are the labor market consequences of the recent surge in services offshoring? While offshoring has traditionally been found to affect only less-skilled workers in industrialized countries, this study finds that services offshoring also has negative consequences for high-skilled workers. Focusing on the case of Germany, Deborah Winkler shows how services offshoring has grown, who is most affected and what policy makers can do. Winkler measures the impact of services offshoring on German productivity, employment, and employment structure. She provides a well-balanced synthesis of theoretical insights, detailed empirical analysis, and economic policy recommendations. Although her main focus is on the case of Germany, many insights are also applicable to other developed countries.

Construction Law Oct 11 2021 Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices worldwide. Published in

three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey Lloyd QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law.

**Invalidity** Jan 22 2020 *Studies in the Contract Laws of Asia* provides an authoritative account of the contract law regimes of selected Asian jurisdictions, including the major centres of commerce where limited critical commentaries have been published in the English language. Each volume in the series aims to offer an insider's perspective into specific areas of contract law - remedies, formation, parties, contents, vitiating factors, change of circumstances, illegality, and public policy - and explores how these diverse jurisdictions address common problems encountered in contractual disputes. A

concluding chapter draws out the convergences and divergences, and other themes. All the Asian jurisdictions examined have inherited or adopted the common law or civil law models of European legal systems. Scholars of legal transplant will find a mine of information on how received law has developed after the initial adaptation and transplant process, including the mechanisms of and influences affecting these developments. At the same time, many points of convergence emerge. These provide good starting points for regional harmonization projects. Volume IV of *Studies in the Contract Laws of Asia* deals with factors affecting the validity of contracts (mistake, fraud, misrepresentation, coercion, and unfair exploitation) in the laws of China, Hong Kong, India, Indonesia, Japan, Korea, Malaysia, Myanmar, the Philippines, Singapore, Taiwan, Thailand, and Vietnam. Typically, each jurisdiction is covered in two chapters; the first deals with erroneous beliefs, while the second deals with reprehensible conduct of one of the contracting parties.

Fashion Marketing in Emerging Economies Volume I Sep 10 2021 Over the past few decades emerging markets have experienced an increased share of global manufacturing service within the fashion industry, coupled with an increasing market share, particularly for women's mid-market apparel. In order for fashion firms to succeed in these markets it is crucial to gain an understanding of the state of the industry, macro-environmental factors, traditions and religious beliefs. A one-size-fits-all approach to global fashion marketing strategy now requires a step-change; fashion firms require dedicated strategies which fit the need of the fashion brands that are operating or seeking to operate within emerging markets. In this contributed volume, authors shed light on fashion marketing strategy for emerging economies and recognise these markets as major growth centres. Chapters explore core topics such as brand management, sustainability, digital marketing, analytics and data science. Covering a wide range of emerging markets, chapters provide case studies from China, India, Ethiopia, Romania, Turkey, Brazil and Nigeria, among others. This book responds to the growing demand for research, information, recommendations and insight from

practitioners, entrepreneurs and academics who are eager to understand marketing strategies, tools and technologies that will work within this unique industry.

**From Underdogs to Tigers** Dec 01 2020 In 1980 the Indian software industry was practically non-existent. By the 1990s the industry was one of the largest employers in manufacturing. Similar patterns of growth can be found in other emerging economies. So given that the software industry is commonly viewed as a high-tech industry, how is it that such spectacular growth has occurred in countries where high-tech industries would not seem likely to develop? This book examines the reasons behind this phenomenon, and asks whether it suggests a new model of economic development. The contributors explore the implications of the rise of these newcomers to the software market for the global industry, and whether there are things to be learnt about the role of human capital in economic growth, firm formation and capabilities, business and managerial models, and industry structure. Chapters include country studies on Brazil, China, India, Ireland, and Israel, and are complemented by cross-cutting chapters on some of the key issues highlighted by the growth patterns of software in these nations, most notably the role of the multinational companies, the globalization of the skilled worker flows, and the formation of firm capabilities. The novelty of the growth patterns in the regions that studied makes this book useful for understanding analytical and

empirical issues underlying new microfoundations of economic growth in some emerging regions of the world.

*The Trojan Horse* Jul 08 2021 This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). The Trojan Horse traces the growth of commercial sponsorship in the public sphere since the 1960s, its growing importance for the arts since 1980 and its spread into areas such as education and health. The authors' central argument is that the image of sponsorship as corporate benevolence has served to routinize and legitimate the presence of commerce within the public sector. The central metaphor is of such sponsorship as a Trojan Horse helping to facilitate the hollowing out of the public sector by private agencies and private finance. The authors place the study in the context of the more general colonization of the state by private capital and the challenge posed to the dominance of neo-liberal economics by the recent global financial crisis. After considering the passage from patronage to sponsorship and outlining the context of the post-war public sector since 1945, it analyses sponsorship

in relation to Thatcherism, enterprise culture and the restructuring of public provision during the 1980s. It goes on to examine the New Labour years, and the ways in which sponsorship has paved the way for the increased use of private-public partnerships and private finance initiatives within the public sector in the UK.

**Global Problems, Global Solutions** Dec 25 2022 **Global Problems, Global Solutions: Prospects for a Better World** by JoAnn Chirico approaches social problems from a global perspective with an emphasis on using one's sociological imagination. Perfect for instructors who involve students in research, this text connects problems borne by individuals to regional, global, and historical forces, and stresses the importance of evidence in forming opinions and policies addressing social issues. The book introduces readers to the complexities of the major problems that confront us today such as violent conflict, poverty, climate change, human trafficking and other issues that we encounter in our lives. It book concludes with a chapter on politics and government, underscoring the need for good governance at all levels—and cooperation among many layers of government—to build a better world.
